RECOMMENDED ACTION AND JUSTIFICATION: Resolution authorizing the purchase of Cross Match ID 500 Live Scan and components for the production of Child ID information and Applicant fingerprint collection. To be purchased with money collected through the Tobacco Settlement Fund 367-0106-305-6717. Total purchase price 17,703.22

The Mariposa County Sheriff’s Office has been actively involved in providing Child Safety Programs at various events throughout the county that are sponsored by local schools, public service groups and county agencies. These Child Safety Programs have included the fingerprinting of children, the collection of D.N.A. and most recently the issuance of Child Emergency Information Cards. Each of these programs has provided parents/guardians with a quick and easy source of information to aid in the locating and identifying of lost or missing children. The goal of the Mariposa County Sheriff’s Office is to provide parents/guardians with critical information that may be needed in the event that their child should ever be lost or missing.

Until recently, law enforcement has been limited in its ability to incorporate various forms of identification (I.E. Fingerprints, Photographs, Text) into a single program. Cross Match Technologies Inc. currently produces a product that allows law enforcement to create an identification sheet that is all-inclusive. The Cross Match ID 500 produces an identification sheet, which contains a full set of a child’s fingerprints, a photograph of the child and a text record of pertinent information relating to the physical description and personal information of the child. In addition to the identification sheet, the Cross Match ID 500 prints two ID cards that contain the child’s thumbprint, picture and physical information. These ID cards can be carried in a wallet or purse and provides parents with a means to quickly provide law enforcement with child information anywhere at any time. Studies have shown that the availability of this information within the first hour of a child’s disappearance can dramatically increase the odds of the child being located and safely returned to their home.

Unlike many electronic fingerprinting devices, the Cross Match ID 500 is completely portable and can be utilized any place where a standard household power source is available.

Attached to this agenda action form is a sample of the product that could be produced at any child safety event.

In addition to the child safety sheet, the Cross Match ID 500 will also be able to perform the applicant tasks that are required for individuals wishing to volunteer at schools and other positions that require a person to have a criminal records check conducted through California Department of Justice or the FBI. The live scan machine that is currently used for applicants is not portable and due to its age, has become unreliable and has begun to experience breakdowns.
