PROJECT DESCRIPTION: Catheys Valley Ball field Lights PW-02-12
Installation of new light fixtures and poles on pre-fabricated foundations, and supply power to new fixtures. There will be an overhead line from P.G.&E. then the rest would be underground. The lights to be used meet strict spill and glare light requirements, and control up to 95% of spill and glare. See enclosed manufacturer specifications for details regarding the light technology being used.

Work is to be done at an existing baseball diamond, to allow nighttime use of the field. The lights will not be used after 10:00 p.m. and will be enforced by the Department of Public Works. This will be achieved by setting the system up on a programmable timer; any changes to the hours of operation will be made public for review purposes. The Public Works inspector will ensure that the timing controls are installed during construction. The ability to use this field at night will ease the current demand on fields in Mariposa County. This project will not create more demand on the field, but will allow the current demand to be spread out into the evening.

No significant effect is based on review procedures of the following County Departments or Divisions:

☐ Building Division  ☐ County Health Department
☐ Planning Department  ☐ Public Works Department
