Resolution authorizing the Chair to sign a personal service agreement with Dan Michael to test and rebuild Self Contained Breathing Apparatus for outside agencies as an enterprise opportunity.

BACKGROUND

As a result of the expense of the testing equipment and training required, many agencies such as the US Forest Service prefer to contract for this testing. The department as a cooperator with the US Forest Service has been requested to provide this service for direct reimbursement.

The National Fire Protection Association (NFPA) as well as National Institute for Occupational Safety and Health (NIOSH) define and mandate performance and testing requirements for SCBAs. The department now meets minimum standards for testing and servicing SCBAs.

The purchase of the test bench and training by the SCBA vendor allows the Department to economically rebuild, service and test these units. The unit contains a computer which is calibrated annually by the manufacturer, provides testing compliance under control of the manufacturer.

Our role is to process the testing and to rebuild units that meet this pre-set acceptance criteria. Each SCBA must be flow tested annually, and rebuilt every three years. Excess capacity can be made available to outside agencies in an enterprise configuration.
