## **EXHIBIT A**

### **South West Interface Project (SWIFT) Title III Project Proposal**

#### **Request:**

The County of Mariposa join with the County of Tuolumne in support of the South West Inter-Face Team (SWIFT) Project Coordinator contract for services with Allen Johnson. The Mariposa County share of the Contract is to be for a one-year period, with 290 hours of work at \$31 per hour for a total cost of \$9,000.

#### **Conformance to the Intent of SR 2008:**

The SWIFT Project's goal is to cooperatively plan and implement a strategic fire defense system designed to reduce the threat of loss to life, property, and natural resources in the Southern Tuolumne and Northern Mariposa County wild-land urban interface. Currently, County, State, and Federal agencies in addition to a number of other collaborative partners are working together to mitigate the fire problems in this specific area. The 132,000 acres project area has a significant history of repeated large catastrophic fires. The agencies and partners involved in the collaborative wildfire protection effort all have various protection responsibilities within the area, and have joined together in an interagency team effort to work on mitigating the wildfire problems. The team consists of representatives from Mariposa and Tuolumne County Fire Departments, California Department of Forestry and Fire Protection (Cal FIRE) for the Tuolumne/Calaveras and Madera/Mariposa/Merced Units, Bureau of Land Management (BLM), United States National Forest Service – Stanislaus National Forest – Groveland Ranger District, Hetch Hetchy Water & Power, Mariposa County Fire Safe Council, Yosemite Foothills Fire Safe Council, Groveland Fire Department, Tuolumne County Resource Conservation District, Yosemite National Park, and the Pine Mountain Lake Association.

There are a total of 12 high value watersheds within the project area. These watersheds are significant based on their contributions to California's need for abundant water and power supplies. There are 10 residential areas inside the project boundary.

Opportunities to support fire protection come from strategically placed and well planned thinning projects, biomass operations, and multi-product vegetation offerings. Efforts are made to utilize local contractors in work on such fire defense systems as fuel breaks, road corridor fuel treatments, and other hazard reduction operations.

The SWIFT project had been planned to enhance and benefit forest and watershed health by protection of existing ecosystems from damaging wildfires. Allen Johnson retired from the Forest Service have served as District Fire Management Officer. He is currently serving as the Project Coordinator. Duties include mapping, meeting coordination and agenda preparation, document development, collaborative work with all stakeholders, presentations and developing various reports, and attending all meetings that are relevant to SWIFT operations.
