ALTERNATIVES

The present 47 acre site is receiving an approximate average 35 tons per day from all sources. A projection of the life of this site has been recently extended from 2 years to 4 years by new excavations and changes in procedure, allowing a more efficient use of cellular placement. It has been projected that if cover material was available, the space factor on this site would allow 35 to 40 years of operation at the present volumes. Cover mater-
"al, then is our basic problem along with many other corrections required to bring this site into compliance.

There are two alternatives under intense study at the present time. These studies are being directed by the Solid Waste Task Force, which consists of the Solid Waste Committee members of the Board of Supervisors. Engineering Planning Board.

MARIPOSA COUNTY RESOLUTION NO. 86-90
APPROVING ADDENDUM TO SOLID WASTE MANAGEMENT PLAN

WHEREAS, the County has submitted the Solid Waste Management Plan to the State for approval; and
WHEREAS the State has required amendments to said Plan;
NOW, THEREFORE, BE IT HEREBY RESOLVED by the Board of Supervisors of Mariposa County, a political subdivision of the State of California, that:

1. Addendum to Solid Waste Management Plan is approved
2. Board finds that said Addendum is adequately included in the Negative Declaration for said plan
3. Board further directs that the following exhibits be attached to said Plan: Board’s action which created the Solid Waste Task Force and changes thereto, and Board’s action relative to soliciting Request for Qualifications for hiring a solid waste consultant.

PASSED AND ADOPTED by the Mariposa County Board of Supervisors this 11th day of March, 1986, by the following vote:

AYES:  BARRICK, DALTON, ERICKSON, RADANOVICH, TABER
NOES:  NONE
ABSENT: NONE
ABSTAINED: NONE

[Signature]  LEROY RADANOVICH, Vice-Chairman
Mariposa County Board of Supervisors

ATTEST:

Ex Officio Clerk of the Board

APPROVED AS TO FORM AND LEGAL SUFFICIENCY:

[Signature]  JEFFREY C. GREEN, County Counsel
preliminary soils studies consisting of exploratory excavations, core drilling permeative tests and topography mapping have been done. The scope of this work is only preliminary and in house; many more studies must be done under direction of experienced experts in the field. This site, approximately two miles northwest of the present site, adjacent to Highway 49 north of the Mariposa-Yosemite Airport, is privately owned and is in unclassified zoning. The present use is inactive mineral exploration. The life of the portion of this site (100 acres) to be used as land fill, (400 acres for buffer zone) is tentatively estimated at 50 years.

The Planning Department is involved in the operation of the Task Force to ensure compatibility to adjacent zoning in considering either of the two alternatives. Water Quality Control will be monitoring our planning procedures beginning with attendance at the Task Force meeting of March 3, 1986.

Opposition to either alternative has been minimal to date. A group of owners of a subdivision of 10 acre parcels approximately 1 mile to the east of the possible new site was formed in opposition. The leadership of that group was brought into the Task Force and are presently assisting in the deliberations.

A recycling contract between the County and a private sector firm was begun in the summer of 1985 and although, the group has experienced difficult marketing problems it is still in operation. The effect on our volume, to this point has not been significant. The contract is designed to bridge any change in operation of the present site or development of a new site and to be continuous as long as other contractual requirements are met.

Considering the revenue available in a County of approximately 13,000 people, the financing of either of the above mentioned alternatives is obviously impossible. Our only possibility lies in the fact that federal use of our site (Yosemite National Park) will generate a large financial involvement by the National Park Service. These negotiations are actively under way with no definite commitments at this time. The Task Force is actively exploring the effect of contractual private sector involvement in development of either alternative as well as future operation.
The County Board of Supervisors will revive old studies and inaugurate new studies of possible user fee applications. Our outside target date for implementation is June, 1989 but we consider it mandatory that the time frame be shortened considerably.
Supv. Radanovich initiated discussion re forming a solid waste task force to work on the development of proposed new solid waste site; and underground tank inspection requirements. Supv. Dalton returned at 9:56 a.m. On motion of Radanovich, seconded by Erickson, Board formed a solid waste task force, as an advisory committee to the Board, to work on the development of proposed new solid waste site and program; and to develop a comprehensive plan for the disposal of rubbish and toxic materials in the County. The task force to consist of the following: 1) two members of the Board of Supervisors; 2) Barry Bell, County Sanitarian; 3) Jeff Green, County Counsel; 4) Bill Lincoln, County Engineer; 5) Jerry Progner, Soil Conservation District Conservationist; 6) Bob Borland, Planning Department Planner; 7) John Thomson, Air Resources; 8) Roger McElligott, Solid Waste Manager; and 9) two citizens of Mariposa County. Under discussion, Roger McElligott commented on changes in closing requirements for a solid waste site; the need to proceed with preliminary engineering; offered to arrange for the Board members to visit the proposed site; and recommended, with regards to the task force, that the Board have representation from the northside of the County. Ayes: Unanimous. Solid Waste Manager to include formation of solid waste task force in the Solid Waste Management Plan.

Yosemite National Park
P.O. Box 577
Yosemite National Park, CA 95389

Dear Mr. Morehead:

At its meeting of February 18, 1986, the Mariposa County Board of Supervisors took the following action: On motion of Erickson, seconded by Radanovich, the Board approved requesting the National Park Service to provide a representative to serve on the Solid Waste Task Force. Ayes: Unanimous.

The next Solid Waste Task Force meeting has been scheduled for March 3rd at 10:00 a.m. in the Mariposa County Courthouse. This is a very important meeting that will include Water Quality Control representatives, and representatives of the Solid Waste Management Board.

In order to plan for the meeting, please advise who the representative will be from the Park Service to serve on this Task Force. If you have any questions, please do not hesitate to contact me.

Sincerely,

LEROY RADANOVICH, Vice Chairman
Mariposa County Board of Supervisors
