BE IT RESOLVED by the Board of Supervisors of the County of Mariposa, a political subdivision of the State of California, that the Board hereby adopts the Mariposa County Solid Waste Management Plan (PLAN) as presented this date, and

BE IT FURTHER RESOLVED that the Board of Supervisors hereby adopts a Negative Declaration for the PLAN based on the initial study as presented. A copy of the PLAN is attached hereto, marked Exhibit "A", and by this reference incorporated herein.

PASSED AND ADOPTED this 19th date of November, 1985, by the following vote:

AYES: Barrick, Erickson, Radanovich, Taber, Dalton

NOES: None

ABSENT: None

ABSTAINED: None

SOLID WASTE MANAGEMENT PLAN
FOR
MARIPOSA COUNTY

This plan is the result of research and input on the part of Mariposa County's officials, business men, and other interested citizens. The plan is intentionally open-ended so that the County may make adjustments reflecting new techniques and incorporate improvements and suggestions of merit.
SOLID WASTE MANAGEMENT PLAN OBJECTIVES

To develop a comprehensive, County-wide solid waste management plan that will provide for, regulate, control and coordinate the storage, collection, transportation transfer, reclamation and disposal of all solid waste generated within Mariposa County.

To insure the preservation, and to the greatest possible extent, enhance the County's environmental resources, including scenic and recreational areas, and avoid pollution of the lands, air and water.

To insure the preservation, and to the greatest possible extent, enhance community values throughout the County by proper and appropriate systems operations and facilities, avoiding depreciating noises, odors, disease vectors and unsightliness.

To encourage full and active participation in the planning process by all segments of the County's inhabitants, including private citizens, citizens' groups, business and appropriate governmental units.

The plan should provide for the protection of the public health, consistent with community goals and objectives and be in full conformance with California guidelines established by the Solid Waste Management Board.

Whenever feasible, to plan for the reclamation and recovery of materials in an effort to resist the waste of our natural resources.

To periodically review and update the plan, and implement needed changes as conditions and finances allow.
MARIPOSA COUNTY

SOLID WASTE BACKGROUND

SECTION III
BACKGROUND

Mariposa County, a rural county with a population of approximately 13,100 persons scattered throughout its 1,455 square miles, is unique in that it has no incorporated cities or large population centers with the exception of Yosemite National Park, a Federal park, that accommodates approximately 2 ½ to 3 million visitors per year. The county is situated in the approximate center of California and is bordered on the west by Merced County, on the south by Madera County and on the north by Tuolumne County.

Prior to 1970, the small amount of solid waste generated within the county was disposed of in any of the seven open-burning dump sites located in the vicinity of the areas served, with the Yosemite National Park Service disposing of its own waste by incineration. The county dumps were burned over at seasonal intervals and, although not aesthetically desirable, served the county at a cost within its means. The State of California, having legislated air quality control measures, imposed rules upon the rural counties which eventually led to the closing and rehabilitation of all but one of the solid waste disposal sites within Mariposa County. The closing and rehabilitation of the dump sites led to considerable expense and inconvenience on the part of the taxpayers.
BACKGROUND (CONT'D)

In an effort to cooperate with the various state agencies and eventually comply with the intent of SB-5, a plan was prepared and adopted by the Mariposa County Board of Supervisors early in 1974. The implementation of this plan was delayed for several months because of the unavailability of equipment needed to implement the plan. Before the year was out, the county had expended approximately $150,000. for basic equipment and site rehabilitation.

The present plan is the result of considerable research and has included input from the general public. At the present time a new Solid Waste Management Advisory Committee, for Mariposa County is being formed Planning Commission and appropriate officials in Madera, Tuolumne and Merced Counties. In addition to the above, the problem and its solutions have been discussed at open meetings of the Mariposa County Board of Supervisors.

A sincere effort has been made to consider the input of all persons and groups in the plan's composition. Both the 1974-1975 plan and the Solid Waste plan agree with the Mariposa County General Plan as adopted by the Board of Supervisors.
MARIPOSA COUNTY
SOLID WASTE
THE REGION

SECTION IV
THE REGION

Mariposa County area is located in Central California on the western slopes of the central Sierra Nevada range. The eastern part of the area is occupied by Yosemite National Park. The northern boundary is Tuolumne County, the southern boundary is Madera County, and the western boundary is Merced County.

Mariposa County has an area of 1,455 square miles or 931,200 acres, of which 378,852 acres are in the Mariposa County area. The remaining 452,348 acres are Bureau of Land Management lands, Yosemite National Park, and Sierra and Stanislaus National Forests.

Elevation in the county ranges from about 300 feet along the western boundary to about 10,000 feet in the mountainous eastern part. In the areas being considered in this report, however, few places have an elevation of more than 5,000 feet.

The County of Mariposa has no railroad, and transportation of any nature is handled on approximately 500 miles of county road and by State Highways 41, 140, 49, 132 and 120. Both the county roads and the state highways in this area are typical mountain roads offering the hazards one would expect in such an area.

A significant factor to be considered in the solid waste collection and transfer in Mariposa County is the weather.
The majority of precipitation in Mariposa County occurs from storms sweeping in from the Pacific during the period of October 1, to April 30. Approximately 93 percent of the total precipitation occurs during this time. The amount of precipitation varies from 20 inches at the lower elevations to approximately 30 inches at the 5,000 feet elevation. It should be noted that the communities of El Portal, Fish Camp, Midpines, Greeley Hill, Bear Valley, Coulterville and Buck Meadows have occasional snowfall during these winter months which can present a real problem in the transferring of solid waste.
MAIPOSA COUNTY
SOLID WASTE
THE PROBLEM

SECTION V
THE PROBLEM

The county population is established at 11,000 persons, so dispersed throughout the county that the distances from a given point are great while the amount of solid waste is small.

Estimating all types and sources of generated waste in the area controlled by the county would generate approximately 15.5 tons per day or 5657 tons per year. This does not include the approximately 5,000 tons per year of waste generated in Yosemite National Park which is presently being transported to the Mariposa sanitary landfill disposal site.

Since Mariposa sanitary landfill site is the county's only established legal disposal site, it becomes apparent that all solid waste will be brought to the Mariposa site or new dump sites must be developed throughout the county. Investigations of the cost have proven that with the limited amount of solid waste in the smaller communities the legal establishment and proper maintenance of said disposal sites would be impractical and economically unfeasible. In view of the above, consideration must be given to the volumes and distances involved in transporting solid waste to the Mariposa disposal site, hereinafter referred to as the Mariposa site. The following are the approximate distances from the various communities to the Mariposa site followed by the estimated daily maximum tonnage:
THE PROBLEM (CONT'd)

a. Buck Meadows - Distance 50 miles - estimated tonnage daily .7
b. Greeley Hill - Distance 34 miles - estimated tonnage daily 2.0
c. Coulterville - Distance 26 miles - estimated tonnage daily 2.5
d. Bear Valley - Distance 9 miles - estimated tonnage daily 1.0
e. Fish Camp - Distance 51 miles - estimated tonnage daily 2.0
f. Hornitos - Distance 22 miles - estimated tonnage daily 1.5
g. Mariposa - estimated tonnage daily 5.8

Two factors should be noted at this point. A) Being primarily a mountain county, the topography makes distance an important time and cost factor. B) The small tonnage to be transported results in a much greater cost-per-ton mile.

Being a recreation area with high visitation, some litter is left along state and county roads but road crews now handle this problem.

Being primarily a non-agricultural area and with no major manufacturing enterprises, the hazardous waste problem is practically non-existent. State and Federal entities, the only potential source of hazardous waste containers, handle their problem, as does the county in general, by transporting such materials to the Class 1 dump in Fresno County.

Unauthorized persons have been transporting solid waste, particularly tires, into Mariposa County and dumping them illegally. This has led to an ordinance prohibiting such a practice. This ordinance does not, however, limit the county's interest in establishing a "Joint Powers Agreement" relative to solid waste disposal should circumstances indicate such to be feasible.
MARIPOSA COUNTY
SOLID WASTE
ALTERNATIVES

SECTION VI
ALTERNATIVES

A new main disposal site must be acquired and be ready to operate within the next two years.

1. There are applications underway at the present time in an attempt to acquire a new site from the Bureau of Public Lands. Other sites on private lands are being sought.

2. The concept of expansion of the present site is now under study by the Solid Waste Committee of the Board of Supervisors, which would allow a smooth transition and uninterrupted use of the present site, the expanded area providing cover material.

Our problem with the present site is not lack of space, but rather a shortage of cover material. Such expansion should extend the present site ten years or more depending upon the effect of the recycling proposal as noted in section VIII (a). Because this concept of cover material from adjacent land is only in the discussion phase, we are not able to direct or apply any environmental consideration.

Implementation Schedule

3. More probable, however, is acquisition of an entirely new site and at this time two properties, apparently available, are being considered. We are preparing at this time to begin topographical and geological engineering viability studies, these to be completed in the very near future. The Solid Waste Committee of the Board of Supervisors has directed all involved county departments to collectively set a target date for actually opening a new facility during 1986.

The two areas being considered are both approximately 3½ miles north of the present site. One lying in the general area between Mt. Bullion Cut-Off Road and Highway 49, the other in the area between Old Toll Road and Highway 49. Both sites are in the Fremont Las Mariposa Grant, in the Green Gulch - Mt. Opher area as shown on the U.S.G.S. Bear Valley Quadrangle.

A task force has been formed by the Board to implement early action on future site acquisition and future County-wide Solid Waste Planning.
MARIPOSA COUNTY
SOLID WASTE
ADMINISTRATION

SECTION VII
SUMMARY OF ADMINISTRATIVE STRUCTURE

In an effort to establish positive lines of authority, and delegate specific responsibilities, the Mariposa County Board of Supervisors has adopted the organizational structure shown in the following summary:

The Board of Supervisors has placed administration of the Solid Waste Department under the Special Districts Department and is supervised by the Special Districts Manager.

There has been created a "Solid Waste Management Advisory Committee" that is charged with the ongoing evaluation of the solid waste management program, and the further responsibility of keeping the Board of Supervisors and the Solid Waste Director informed as to the deficiencies or improvements noted.

The site maintenance personnel and the site attendant are to be under the direct supervision of the Special Districts Manager, who shall have the responsibility of assigning and delegating duties and responsibilities to the operational staff.
MARIPOSA COUNTY
SOLID WASTE
THE OPERATION

SECTION VIII
THE OPERATION

The day to day operations of the Solid Waste Department, budgeting and management, are supervised by the Special Districts Department. There are a total of three employees in the department, who handle all transfer and disposal site operations.

The Mariposa site receives all the solid waste transferred from Yosemite National Park, resulting from operation of Federal facilities, as well as Park Concessionaries, waste material from Coulterville, Fish Camp and Hornitos transfer stations and direct from users residing within 20 miles of the site.

All excavation, compaction and cover is done with 2 D-8 tractors which are 20 to 25 years old and a pull scraper of the same vintage. All transfer except Yosemite are accomplished with a 30cy compactor front loading truck with over 300,000 miles on its odometer.

The Mariposa site is open 7AM to 6PM, 5 days per week, for the general public and available to commercial haulers and businesses 7 days per week.

Coulterville transfer station is serviced 3 days per week and Hornitos 2 days per week. Both stations are open 24 hrs per day, 7 days per week and are unmanned. In order to control excessive volume from Madera County, (70%) Fish Camp is serviced and manned 2 days per week from 10AM until 3PM.

Transfer from Yosemite are done by Federal men and equipment and by private contractor.
MARIPOSA COUNTY
SOLID WASTE
MARIPOSA DISPOSAL SITE

SECTION VIII (A)
REPORT OF DISPOSAL SITE INFORMATION

MARIPOSA COUNTY, SEPTEMBER 1983

1) This disposal site is a class-II type area sanitary landfill operation. Approximately 30 tons of solid waste is received daily. Because of seasonal fluctuation in volume, this estimate is higher in the summer and lower in the winter. This solid waste site serves all of Mariposa County, including solid waste transported from Yosemite National Park, Hornitos, Coulterville and Fish Camp. This main site is a 57 acre parcel, located 3½ miles north of Mariposa on Highway 49. Refuse is spread and compacted daily to a depth of 1½ feet. The material used to cover refuse is red sandy clay and rocks, approximately 6 inches of cover material is used daily. Also located at the site is one ½ acre pit used for sewage sledge and septic tank pumpings. This pit is also used for small dead animals. The pit is covered with lime and cover material once a week.

a. Hours of operation are 7AM to 6PM. Open 7 days per week, closed on Wednesday and Thursday.

b. There are five separate solid waste pits set aside for individual solid waste material use:

2 pits for general waste and residential wastes.
1 pit for aluminum, iron, metal, etc.
1 pit for wood material, such as trees, lumber, leaves.
1 pit for rubber tires only
and as described above, one liquid pond for sewage sludge and septic tank pumpings.

c. The operation is carried on by use of 2 John Deere D-8 Caterpillers, and a Caterpillar Scraper.

d. A trailer house is used, equipped with all housing facilities, including an adequate water supply, (12 gallons per minute). Southwest of the trailer house, a well is located, which provides water for dust control and emergency use.

e. A significant factor to be considered in the solid waste collection and transfer in Mariposa County is the weather. The majority of precipitation in Mariposa County occurs from storms sweeping the Pacific during the period of October 1, to April 30 (6 month season). Approximately 93% of the total precipitation occurs during this time. The amount varies from 20 inches at the lower elevations to approximately 30 inches at the 5,000 ft. elevation. Rain fall in Mariposa County.............31 inches Snowfall in Mariposa County.............2-3 inches Frost in Mariposa County..............(Figure recorded as moisture, included in average rainfall).
Due to weather conditions throughout the County, it should be noted that the communities of El Portal, Fish Camp, Midpines, Greeley Hill, Bear Valley, Coulterville and Buck Meadows have extreme weather conditions, which can present real problems in transferring of solid wastes, although regular scheduled pick-ups and transfer are kept as scheduled.

f. The road to the site is paved, the road that leaves the paved road is red clay, this is covered with gravel as necessary during the rainy season. Snow is cleared by available dozers from the access road and the road leading to the solid waste pits. The paved road ends 100 feet from the pit.

g. Noise: No noise control is necessary because of the location of the solid waste site, (no nearby residents).

Odor: Daily covering contains most of the odor. The sewage pond is located at the far end of the 57 acre site, so it does not present a problem.

Litter: Paper and light material is covered to prevent it from blowing out of the pit. Whenever necessary, litter is picked up from around the fence and unused area to keep it as litter free as possible.

Dust Control: If necessary, a water storage tank, with water pumped from the well, is available for hand spraying of the access road and trenches.

Fire: The trench-like structure of the pits limits burning, and fire extinguishers are readily available on all equipment and in the trailer house. Water from the well is also available for control of any burning that might occur. The C.D.F. Main Station is within 1 mile of site and this agency has been very cooperative in fire control.

h. Reclamable and recycleable materials deposited at the Mariposa site are sold by the attendant. Proceeds from the said sale are allowed as a supplement to the attendant's salary, about $4,500 per year.

2) Waste received, consists of 95% residential and commercial wastes; 1% in septic tank pumpings and sewage sledge; 3% white goods, wood wastes, tires, construction debris, etc; 1% dead animals and parts thereof. Large animals are not accepted at this site. The sewage sledge and septic tank pumpings contain approximately 60% water. One company delivers approximately 21 tons of combined solid waste daily, more in the summer and less in the winter. During the next 10 years a 40% increase is expected in Mariposa County's population, which will increase incoming waste at the site.
a. Infectious or Hazardous wastes are not received. Dead animals are deposited in the sewage pond, which is covered with lime and cover material at least once a week. Septic tank pumpings and sewage sledge are pumped into the pond and left for evaporation and covered daily.

b. No hazardous wastes are received at this site.

3) There is 57 total acreage of this site. The site has a life expectancy of 1 year. This is an estimate from previous years use and the expected increase in rate of fill due to population increase average.

4) A 2 lane paved acres road runs from Highway 49 to the attendants trailer, where the paved road ends and a one-way dirt road begins. Entering and exiting from the pir is one-way, which is maintained for safe travel and reduces traffic congestion. The paved road becomes dirt only on entering the pit area, which keeps dust from the attendants trailer. There is a stop sign at the junction of the road to the site and Highway 49. The attendant directs traffic to the required pits, preventing an overload of vehicles at the pits, at any time. During holidays and after closing, there is a locked gate at the junction, to prevent unauthorized dumping and vandalism.

Yosemite garbage collection trucks deposit at the site once or twice a day, during the summer, considerably less in the winter. The county garbage collection truck deposits at the site 6 to 8 times a week, all year. Commercial garbage trucks deposit 10 times per week. Approximately 200 private vehicles deposit waste at the site per day, considerably less in the winter.

(4) Area Map 1:24,000 USGS scale - See attachment A & Al.

5) See Map Attachment B

6) The site will be graded from west to east until cover material at the site is completely used up. No exact date of closure is available at this time. However, it is expected to be used as a solid waste site for the next 4 years. When a pit is full, it is back-graded with a 10 degree slope for drainage. The sewage pond is cleaned and filled whenever necessary. Because of the small amounts of sewage sludge and septic tank pumpings, new ponds are not dug frequently.

7) Elevation and existing contours are shown on Map Attachment A.

8) The grading of the filled and unfilled areas will continue as described, until the 57 acres are completely used up. The final cover will be red gravelly clay and rock, which will be graded at a 10 degree slope for drainage. It will be graded in the direction of the natural slope of the hillside.
9) The surface and cover material in the area are of the Henneke series; Gravelly, Clayey Loams. The soil at the dump site is no more than 2 feet deep, and less than that in places. Decomposing Serpentine bedrock underlies the shallow soils. The bedrock is easily broken and crushed to a depth of at least fifteen feet, the maximum depth planned for excavation. There is no water table in this area; ground water is found in fractures. A small spring is located downslope approximately 100 yards from the site. It is believed that there is no hydraulic continuity between the spring and the dump site. The spring is monitored to support this assumption. The site is located where storm runoff can be easily excluded. Most runoff is natural flow which is not altered by the solid waste pits. The pits are graded at an angle to allow rain water to run off. There are no drainage ditches present, except along the paved access road. There is no problem in this area.

10) The hardpan located 0 to 7 feet below the red clay, acts as a natural barrier for leachate control.

11) The Solid Waste site has not installed any methane gas vents at this time. (No plans to collect or monitor gas).

12) After this site is completely used up, it will be returned to its natural state, and planted with natural vegetation.

13) This Class II solid waste site is owned and operated by the County of Mariposa.

Before 1968 there was no controlled dumping. The same site was available, but it was considerably smaller, and was not maintained.

14) The Board of Supervisors has approved the contract to allow an extensive recycling process by Yosemite Recycling Co. of the private sector. This operation is designed to reach full potential in 3 years.

15) The Board is also studying the budget effect of contracting all transfer hauls to private enterprise. This could result in savings which would allow for updating the Hornitos Transfer site and placement of one or two new sites.

MARIPOSA COUNTY
SOLID WASTE
COULTERVILLE TRANSFER STATION

SECTION VIII (B)
1) The Coulterville Transfer Station, located on Highway 49, received predominately Group 2 with small amounts of Group 3 wastes. These include residential refuse. (household garbage, yard clippings, newspaper and ashes); commercial refuse; (wastes from food establishments, small amounts of construction debris and packaging material); and tires.

2) The Coulterville Transfer Station receives approximately 35 yards of solid waste per scheduled pick-up day.

3) This transfer station is open 7 days per week. The site has twelve bins for use of county residents. The facilities are located on a 2 acre parcel. The site is operated as a transfer station, with scheduled pick-up dates, 3 times per week. The maintenance of this site is done by county employees for the Solid Waste Department. The solid waste picked up in Coulterville, is transferred to the main disposal site by a 34 yard International Truck, front-end loader. The access road is unpaved, it is red clay and rocks, as is the entire site. The access road is maintained, and covered with gravel during the winter to prevent it from becoming too muddy.

4) Traffic volume consists of approximately 40 private vehicles per day during the summer and considerably less in the winter months.

5) Large items are not accepted at the site. Dead animals and parts thereof are also not accepted. Infectious wastes and septic tank pumpings are also not received.

6) No hazardous wastes are received at the site.

7) Sanitary facilities are not needed at this transfer station.

8) Salvage operations are not permitted at the Coulterville Transfer Station. Salvage operations at the Mariposa Solid Waste site are permitted under contract.

Map of the transfer station and bins are attached.
MARIPOSA COUNTY
SOLID WASTE
FISH CAMP TRANSFER SITE

SECTION VIII (C)
REPORT OF FISH CAMP TRANSFER STATION
MARIPOSA COUNTY, MARCH 1983

1) The Fish Camp Transfer Station is a newly constructed facility of 8 bins, located as per attached map, on property leased from and under the control of the U. S. Forest Service.

2) It is open two days per week only, and is manned by Solid Waste personnel when open.

3) Access is paved, but snow removal an expensive problem.

4) This facility has replaced the former disposal site.

5) Group 2 & 3 wastes accepted only.

6) Salvage operations are not permitted.

REPORT OF HORNITOS TRANSFER STATION
MARIPOSA COUNTY, SEPTEMBER 1983

1) The Hornitos Transfer Station, located on Cemetery Rd., receives predominately Group 2, with small amounts of Group 3 wastes. These include residential refuse, (household garbage, yard clippings, newspaper, ashes and animal wastes); commercial refuse; (wastes from food establishments, small amounts of construction debris, and packaging material); and tires.

2) The Hornitos Transfer Station receives approximately 24 yards per scheduled pick-up day.

3) This transfer station is open 7 days per week. This site has four bins for the use of county residents. This facility is located on approximately 2 acres of land. The site is operated as a transfer station, with scheduled pick-up dates, 2 times per week. The maintenance of this station is done by the county employees for the Solid Waste Department. The solid waste picked-up in Hornitos, is transferred to the main site by a 34 yard Internation Truck, front-end loader. One bin is set aside for large bulky items. The access road is unpaved as is the entire site. The material that the road and parking area consists of is red clay and rocks. The access road is maintained and covered with gravel in the winter to prevent it from becoming too muddy during the winter.

4) Traffic volume consists of approximately 10 private vehicles per day, during the summer, considerably less in the winter. One or two commercial vehicles deposit waste at the station during the week.

5) No hazardous wastes are received at the site.

6) No sanitary facilities are needed at the transfer station.

7) Salvage operations are not permitted at the Hornitos Transfer Station. Salvage operations are permitted at the main Solid Waste site in Mariposa, under contract.

Map of the transfer station and bins are attached.
MARIPOSA COUNTY
SOLID WASTE
ENFORCEMENT PROGRAM

SECTION IX
Mariposa County
Solid Waste Enforcement Program

Introduction
Mariposa County, a rural county with a population of approximately 13,100 persons scattered throughout its 1,455 square miles, it unique in that it has no incorporated cities or large population centers with the exception of Yosemite National Park, a Federal park, that accommodates approximately two and a half million visitors per year. The county is situated in the approximate center of California and is bordered on the west by Merced County, on the south by Madera County, on the north by Tuolumne County and on the east by Mono County.

When the Mariposa County Solid Waste Master Plan was adopted by the Mariposa County Board of Supervisors on June 13, 1983 the combined Solid Waste tonnage of county sources and Yosemite National Park was 9,100 tons per year. Currently, all solid waste disposal is being handled be the Class II disposal site in Mariposa, with transfer stations functioning at Coulterville, Hornitos, El Portal (Yosemite) and Fish Camp.

As part of the Master Plan, the Mariposa County Health Department was designated as the Local Solid Waste Enforcement Agency (LEA), and the Department is responsible for permitting and enforcing all aspects of the solid waste program in Mariposa County. To expedite the establishment of LEAs in 1977, the State Solid Waste Management Board (SSWMB) did not insist that Enforcement Program Plans accompany the submission of the respective proposal enforcement agency designations as otherwise required in Government Code Section 66796.21. The Z'Berg-Kapiloff Solid
Waste Control Act of 1976 requires in Section 66780.5(a) that an "Enforcement Program" shall be delineated in each County Solid Waste Management Plan. This enforcement program plan is intended to serve as a working document to provide on-going guidance to the enforcement agency staff.

The following local solid waste enforcement plan for Mariposa County addresses the administrative, legal, technical and staff development components necessary in the comprehensive solid waste program. Included are a review of State and local regulations, the goals and objectives of the program, inspection and enforcement procedures, a workload analysis, a table of organization, and a program budget. The enforcement program plan was developed in compliance with the Guidance Manual for Preparation of Local Solid Waste Agency Program Plans, 1981, prepared by the Enforcement Analysis Section of the State Solid Waste Management Board.

I. State and Local Regulations
   A. State Regulations: In Mariposa County, the Solid Waste Enforcement Program operates under the following State laws and regulations:
      1. Disposal of Solid Wastes and Infectious Wastes: California Administrative Code (C.A.C.); Title 17, Sec. 488(d), C.A.C., Title 22, Sec. 70848-70847; 71649-71651; 72641-72643; 73643-73645.
      2. Solid Waste Management Standards: C.A.C., Title 14, Sec. 17200 et seq.

4. Disposal of Fetal and Human Remains: Health & Safety Code, Sec. 7054.3 et seq.

B. Local Regulations: In Mariposa County, Solid Waste Standards are found in the Mariposa County Ordinance book. The following ordinances apply:

1. Ordinance 216: Establishes minimum fire regulations for dumps and regulates disposal of animals.

2. Ordinance 259: Regulates garbage and refuse collections, transportation and disposal.

3. Ordinance 286: Regulates scavenging at dumps.

4. Ordinance 291: Repeals part of Ordinance 259 relative to fees.

5. Ordinance 317: Amends part of Ordinance 259 relative to collection.

As there are no incorporated cities in Mariposa County, the entire county is included within the ordinances.

Residents of Mariposa County may dispose of their refuse at the Mariposa Sanitary landfill. Currently, Total Waste Company, and Wawona Disposal companies hold permits to collect refuse within the county, and the National Park Service collects refuse within Yosemite National Park. There is also a contract between Mariposa County and the salvager running the Mariposa sanitary landfill. See section X.

II. Program Goals and Objectives

A. Goal: To assure that all residential, commercial
and industrial solid wastes are stored, transported, transferred/processed and disposed of in a safe, sanitary, and environmentally acceptable manner.

B. Objectives: Administer a solid waste enforcement program that results in the following:

1. All existing disposal sites and transfer stations are operating by authority of a current solid waste facility permit issued by the Mariposa County Health Department.

2. All permit applications for new solid waste facilities, or revisions or modifications of existing facilities will be processed within the time specified in Title 7.3 Government Code, Sec. 66796.32.

3. All permits will be reviewed yearly and revised as necessary.

4. Inspect all disposal sites and transfer stations at least four times per year for compliance with existing standards. The inspections will be conducted under the provisions of the Solid Waste Information System (SWIS) inspection form categories.

III. Solid Waste Facility Permitting Procedures

Currently, the one disposal site and four transfer stations in Mariposa County are operating under permit and new facility permits are not anticipated. However, should a new facility be proposed or the
permit on an existing facility revised, the following procedures would be followed:

A. Permits for solid waste facilities in Mariposa County are based upon information provided in the application for a solid waste facilities permit. A portion of the application is the Report of Disposal Site or Transfer/Processing Station Information and is submitted by the applicant to the Mariposa County Health Department. Information provided is reviewed by staff and verified during a facility inspection. A permit is then prepared using the State Solid Waste Management (SSWMB) format.

B. After preparation, a copy of the proposed permit is furnished the applicant for review and comment. The proposed permit is submitted to the SSWMB for concurrence. Uncontested permits are issued by the LEA within the time required by law.

C. If the Mariposa County Health Department or the SSWMB determines a violation of the State Statutes or Standards exists the permit shall be denied. The applicant may file an appeal to the denial with the LEA who shall then submit the appeal to the SSWMB Hearing Panel. After a hearing, the decision of the Hearing Panel is the basis for an action by the LEA. All appeal procedures shall be carried out in strict compliance with Title 7.3 Government Code and the Administrative Procedures Act.
D. Permits are revised whenever a significant change in facility design or operation is proposed by the operation. Significant changes are considered, but not limited to, adjustment in boundaries, tonnages, elevations and types of wastes that may be received.

E. Permits may be modified when it has been determined that an existing permit no longer provides pertinent data in the findings, in the conditions or in the monitoring data that is necessary for the protection of the public health or the environment.

F. When the LEA becomes aware of a proposed solid waste facility closure, written notification is given the disposal site operator and owner of the closure procedures and requirements.

Closure requirements include notification to the LEA a minimum of 10 days prior to completion or suspension of work at the disposal site. The Regional Water Quality Control Board must also be notified at least 90 days prior to actual closure. A detailed description of the site must be filed with the County Recorder, the County Solid Waste Plan custodian, and the LEA.

Periodic monitoring by the LEA will be made to identify violations that may develop at the landfill site, and transfer stations.
G. Facility records and documents are maintained at the Mariposa County Health Department; facility numbers are those assigned by the SSWMB. General correspondence and inspection records are also maintained at the Health Department.

IV. Inspection and Compliance Procedures

A. All solid waste collection and/or transportation vehicles are inspected at least once annually while enroute or at their corporation yard. The results of these inspections are furnished the owner, and the records are filed at the Health Department.

B. Solid waste disposal and transfer facilities receive routine inspections at least four times per year using the SSWMB's recommended SWIS inspection form. All facilities are county or federally owned and operated, and the operation of the facilities are advised of the time of the proposed inspection to permit them to be present at the disposal site or transfer station. After inspection, a verbal report is made to the operator or to his representative, and the SWIS form is left with the operator. If necessary, a written report is prepared and provided to the operator, and the inspection report and/or written report are maintained in the facility file at the Health Department for six years. Copies of each SWIS inspection form are forwarded to SSWMB.
C. Local Enforcement Agency compliance program actions are:

1. Verbal notice: to storage, collection or facility operators at the time that a violation is identified. A verbal order is confirmed on the SWIS form which is left with the operator. If the operator was not present, the SWIS form will be mailed to him.

2. Written notice: In addition to the SWIS form a written notice may be transmitted by mail to the operator.

3. Office "Show Cause" Hearing: Administrative hearings providing the violator an opportunity to present evidence of compliance to avoid further enforcement procedures.

4. Notice and Order: Prepared and served as provided for in Title 14, California Administrative Code, Chapter 5, (within 5 days of the date of issuance, a copy of the Notice and Order document is transmitted to the SSWMB). Compliance or non-compliance with a Notice and Order is determined by:
   a. inspections
   b. letters of compliance or non-compliance issued by other participating agencies.

D. Written or verbal complaints that solid waste services or facilities are the source of health or environmental hazards or a public nuisance
are accepted and investigated by the LEA if the complainants identity can be established. Any anonymous complaints are investigated only when the probability of immediate health or safety hazard is apparent.

Complaint and investigation results are recorded on LEA forms. Verified complaints may result in the issuance of an official notice and/or abatement order. The results of the investigation are provided the complainant by mail or telephone, with a copy of the report form being maintained in the Site file. Failure to comply with an official notice and/or abatement order is referred to Legal Counsel for enforcement action.

E. The following State and local agencies are closely coordinated in enforcement responsibilities and activities:

1. State Solid Waste Management Board: sets State policy, establishes statewide standards, concurs with, or objects to Solid Waste Facility permits and; aids, assists and oversees local enforcement programs.

2. State Department of Health Services, Hazardous Waste Management Section: regulates and permits hazardous and infectious waste transportation and disposal.

4. Mariposa County Building Department: issues permits for structures at solid waste facility.

5. Mariposa County Special Districts: The special Districts Manager is the Solid Waste Director, who also serves as supervisor to the three employees of the Solid Waste Department.

6. Mariposa County Engineer: provides assistance in engineering matters to the Special Districts Manager.

7. State Department of Forestry: issues "Rubbish Dump Permits" in the unincorporated areas; SSWMB is currently completing Memorandums of Understanding with the Department of Forestry to eliminate the extra permit process.

8. Regional Water Quality Control Boards: issues waste discharge requirements for solid waste disposal sites, and establishes disposal site classifications.

V. Staff Training

Mariposa County has two sanitarians. They are responsible for all aspects of the local enforcement program. Most staff training is via on-the-job training experience, and the Rural Health Division, State Department of Health Services also provides some training. The sanitarian in charge of the LEA is expected to possess the following competencies:

A. Knowledge of codes, minimum standards and local ordinances.
B. Knowledge of individual permit process, permit content and requirements.

C. Scheduling of routine inspections.

D. Establishment of communication with operators and the Special Districts Manager.

E. Inspection technique

F. Field and office report preparation

G. Techniques of written communication of inspection findings.

H. Preparation for administrative hearings and/or court hearings.

I. Administration practices within a solid waste enforcement program.

VI. Workload Analysis

### VIII. Budget

The Sanitarian II position is funded by the State Department of Health Services, Rural Health Division, through a direct services contract with Mariposa County. Under the terms of the contract, the Rural Health Division provides the sanitarian and his/her vehicle, while Mariposa County provides the clerical help and the office space. The Sanitarian II receives administrative support from a Sanitarian IV in the Sacramento Regional Office of the Rural Health Division.

Sanitarian II = $2458/mos x 12 mos/year x .045 Man Years = $1327.67/yr.  
+ normal fringe benefits, travel, etc.
MARIPosa COUNTY
SOLID WASTE
APPENDIX

RECYCLING
PERMITS & LEASES
ORDINANCES

SECTION X
The following types of recyclables are diverted from the County landfill by private sector contractor under a new contract dated 6-1-85:

- Cardboard
- Newsprint
- Aluminum
- Iron & Steel
- Copper
- Glass clear
- Glass colored
- Tires
- Resalable items of furniture
- A composting process is planned for the future

The quantities diverted cannot be estimated at this time since we are only 15 days into the program.

A description of the Yosemite National Park and Curry Co. program is included in the pages.
MARIPOSA COUNTY

SOLID WASTE

RECYCLING
RECYCLING PROGRAM OF YOSEMITE PARK AND CURRY CO.

In response to many requests for information, we have prepared this report of the operation of our recycling program and our refund system on soft drink and beer containers. We hope it will be useful to other Park concessioners, hotel and motel operations, and environmental groups that want specific information about programs in actual operation.

The idea that recycling is desirable took hold in the U.S. during a period of heightened environmental concern in the early 1970's. Since then, many voluntary community recycling programs of various types have been established and the recycling of aluminum and glass has received wide publicity.

In 1974, the Yosemite Park and Curry Co. embarked on a program to recycle all possible materials and adopted the goal of eliminating all garbage. This program was further expanded in May of 1976 by the establishment of a 5¢ refund on all soft drink and beer containers sold in YP&C Co. stores in Yosemite. This creates a financial incentive for Park visitors and employees to participate more fully in the recycling program.

Here are some of the operational details of the program for your use. Any further questions should be addressed to Ed Hardy, Chief Operating Officer of YP&C Co., or Garrett De Bell, Environmental Advisor to the Company.

Each material must first be collected and separated from non-compatible materials, prepared for shipment, stored, and then shipped to the secondary materials dealer.

Here is a breakdown of pertinent information for each material handled.

CARDBOARD

Cardboard is saved by operating units, including the Village Store, smaller satellite stores, restaurants, hotels, gas stations, and the Central Warehouse. The cardboard is backhauled from the unit to the Central Warehouse by Warehouse trucks as they return from making deliveries. Larger units flatten the cardboard and store it in the warehouse racks in which it will be shipped. Smaller units place flattened cardboard into larger boxes which are hauled (as is) to the Warehouse.

Once at the Warehouse, the corrugated cardboard is baled into 500 pound bales using a Model 120SCS60 Trotter Baling Press obtained in September of 1974 for $4,700. The average recycling attendant takes from an hour to an hour and fifteen minutes to produce one 500 lb. bale. The bale is then removed onto a pallet and moved by forklift or pallet inck to the
back dock where it is stored on a pallet until a semi-trailer load accumulates. During the summer, we produce about a ton of baled cardboard daily.

When a truckload of cardboard is produced, a semi-trailer of our Yosemite Transportation System backhauls it to Fresno on the return to our warehouse there. It need be hauled only a few miles extra to Consolidated Fibers, where it is sold. The price range was recently from $26 to $32 per ton.

OTHER FIBERS

In addition to corrugated cardboard, chipboard (flat cardboard) and newsprint are recycled. The chipboard is baled in a Pollution Packer baler, Model 2400, which was purchased in September, 1974, for $2,500. It produces small bales that are then handled as the corrugated and sold to Consolidated Fibers for $8/ton.

Newspaper comes to us in small amounts and is simply boxed and shipped with the cardboard, then purchased by Consolidated Fibers for $20 to $30 a ton.

In evaluating the costs of recycling cardboard and other fibers, it is important to take into account the disposal costs saved, as well as the labor and capital costs of recycling and the income realized. In our case, each 500-pound bale of cardboard would occupy many cubic yards of dumpster space which we currently pay $3.00 per cubic yard to have handled by the Park Service dumpster system.

BEVERAGE CONTAINERS

All soft drink and beer containers sold by YP&C Co. in Yosemite carry a 5¢ refund. This system was voluntarily instituted by the YP&C Co. in cooperation with the EPA and NPS to help the EPA determine the real costs and the solutions to any operational problems that might develop. The program has been so successful that it will continue as a routine operation after the test period is over on September 19. Each container is marked with an NCR stick stamp (made specially by Garvey Corp. in Missouri) with Garvey frozen food ink in red.
The marking of containers by an experienced person takes approximately an hour for 200 cases. Cans are marked on the bottom, bottles on side or bottom. We have not been able to find an ink that will adequately stick to containers that is of food grade; thus, cans are marked on the bottom, rather than the top. Unmarked containers are also accepted for recycling, but no refund is paid. Currently our return rate is 73%, resulting in a shipment of a ton or more of aluminum per week, bringing in approximately $300, and lesser quantities of glass and bi-metal containers, which are shipped in truckload lots every six weeks or so. The off-season volume, of course, is much less.

Each material is then handled separately for recycling. There is some variation in prices paid for recycled materials, but, more importantly, different buyers set different conditions, depending on their needs for the materials and their business practices. It is wise to consider the distance of paid (as opposed to deadhead) shipping, days and times materials will be accepted, whether or not they help unload the materials, whether they have a scale to do the weighing or if an extra stop to obtain a certified weight ticket is required, and if so, where. To give an example of an important variable: We sell our glass for $20 a ton to Madera Glass Company. They do not require it to be color sorted or to have small neck rings removed. This saves considerable time in preparation and simplifies storage.

ALUMINUM

Aluminum is the easiest material to handle. Our Warehouse trucks backhaul plastic bags containing about 300 aluminum cans as they return. Also, a stakebed 3/4 ton truck makes the rounds of our units in Yosemite Valley daily between 4 and 8 p.m., picking up beverage containers from units and from recycling stations located in dormitory housing areas. The bags of aluminum are then taken to a small parking lot where they are loaded into either a 22 ft. or a 26 ft. trailer for storage. It is not necessary for us to crush the cans, as we have adequate space in our own trucks for backhauling to Fresno. If trucking had to be paid for, then compacting or shredding the cans would probably be justified. We simply throw the cans in bags from the storage trailer into the semi, and the driver goes only a mile or two out of his way to deliver the materials to Reynolds Aluminum in Fresno. We realized about $300 each week from aluminum sales during the summer. This helped offset labor costs of operating the program.
BI-METAL

Bi-metal containers are the most difficult for us to recycle. The markets are distant: San Francisco, San Jose, and Sacramento, all hundreds of miles away. Because of this, and because of the generally unfavorable environmental analysis of the bi-metal can, we have been phasing them out of our operation and soon will not have any appreciable quantity of bi-metal containers. The physical details of handling the bi-metal are the same as for the aluminum, except the price is much less, about $20 a ton.

TIN

Tin cans are also accepted for recycling. They must be clean. At the recycling storage area, the bottoms are cut-out and the cans flattened with a manual smasher consisting of a heavy piece of metal about 8" square fastened to a long metal pipe. Current value, $30/ton.

GLASS

We handle glass by dumping it into a wooden chute where it slides down into a 55-gallon drum. The fall breaks the containers, and we carry the full drums to Madera Glass Company, 30 miles out of the way of our normal backhaul. The drums are moved about with a manual barrel dolly and loaded with a liftgate. They are then hauled back as space permits. We use old Clean Quick drums for our recycling containers. These are painted in the same environmental colors used on our shuttle buses and highway buses and on the Recycling Center itself. In addition to the symbolic value of the colors (dark green representative of core of the earth, light green the earth's surface, light blue inner atmosphere, and dark blue for universe), they are pleasing to the eye and are felt to blend in well with a National Park environment.

SCRAP METAL

Car batteries and scrap metal of various types, including copper, brass, and steel, are accumulated until a truckload is on hand. Then a scrap dealer comes and takes it away in exchange for the value of the materials.

FOOD WASTES

Most food wastes, other than fat and bones, in our restaurants is disposed of by using a Model SSD-8 10 horsepower waste king universal commercial disposer to add the waste to the sewer system. Smaller disposals
Cooking grease is saved in 55-gallon drums specially fitted with a tight top. When a drum is full, it is backhauled to our Yosemite warehouse, and when a pickup load is ready, the dealer is called. He comes and picks up the material for 4¢ a pound.

Bones and fat from our Village Store are also saved, stored in the freezer, and shipped to Peterson Manufacturing in Fresno and sold for 2¢ a pound for fat and ½¢/lb. for bones.

WOOD

Wood scrap, both from our carpenter shop and from broken pallets, is cut up and used for firewood in our operating units and by employees for use in fireplaces. Wood from demolition projects is made available to campers for campfires when possible.

FUTURE IMPROVEMENTS

In the near future, we will begin phasing out the remaining dumpsters in our employee housing areas and replace this with collection of sorted wastes for recycling.

We are currently exploring the conversion of manure to methane gas for propelling shuttle buses. We hope to begin a pilot project in the near future.

We are planning to initiate a program of recycling of waste paper and computer paper from our offices. This will complement the present recycling of computer cards. The only difficulty with this is the large number of people who must each be educated to the separation necessary to make the program a success.
At the present time there exists an agreement between the County and Mrs. J. Enos concerning salvage.

This agreement will be terminated within 90 days and a new agreement will be consumated with Yosemite Recycling. See Sect. VIII 14.
MARIPOSA COUNTY
SOLID WASTE
PERMITS & LEASES
AGREEMENT

This Agreement, made as of April 26, 1983 between the COUNTY OF AGREEMENT, a political subdivision of the State of California, hereinafter referred to as "COUNTY", and Mrs. Jennie Enos, a married woman, hereinafter referred to as "SALVAGER".

STATEMENT OF CONTRACT

COUNTY is presently operating a sanitary landfill operation located adjacent to Highway 49 North, Mariposa, California. In order to provide maximum effectiveness in the use of the sanitary landfill site, it is necessary to avoid the placing of salvageable material which has recyclable value. Therefore, it is the intent of COUNTY to contract for the separation of these items and provide for the salvage thereof.

1. SALVAGER shall inspect refuse entering the sanitary landfill site to insure that all items of salvage value are deposited in the area designated for the storage of said items and that no such items be deposited in those areas reserved for defense.

2. All sheet steel or "tin" material shall be the property and under the control of the COUNTY after it is placed in the designated storage area by SALVAGER.

3. SALVAGER shall insure that all items salvaged shall be removed from the sanitary landfill site within sixty days of its being salvaged.

4. COUNTY confirms that payment to SALVAGER the sum of Four Hundred Seventy-Five Dollars ($475.00) per month during the period of this Agreement. Further, SALVAGER shall receive as additional compensation all rights to any profits derived from the sale of said salvage except the sheet steel or "tin" material which shall
be the property of COUNTY

5. The terms of this Agreement shall be for one year com-
mencing on May 1, 1983 and terminating April 30, 1984. Either
party may terminate this Agreement by giving thirty days' written
notice to the other party.

6. SALVAGER shall be responsible for performing the work
under this Agreement in a safe skillful, and workmanlike manner
and shall be liable for her own negligence.

7. This instrument embodies the whole agreement of the
parties. There are no promises, terms, conditions, or obligations
other than those contained herein; and this contract shall super-
cede all previous communications, representations, or agreements,
either verbal or written, between the parties.

EXECUTED this 5th day of May, 1983, at Mariposa,
California.

Permission is hereby granted to Mariposa County

of Mariposa County Solid Waste Dept., 4639 Ben Hur Road, Mariposa, California 93338, hereinafter called the permittee, to use subject to the conditions set out below, the following described lands or improvements:

National Forest Land located in:

S4 SE4, Section 13, T.5S., R.21E., M.D.M., as shown on Exhibit A, dated 9/12/79; Exhibit B, dated 9/12/79; Exhibit C, dated 9/10/79; and Exhibit D, dated JAN 15 1980

This permit covers 0.3 acres and/or -- miles and is issued for the purpose of:

Maintaining and operating a public solid waste transfer station which is an integral part of the County solid waste management plan.

1. Construction or occupancy and use under this permit shall begin within 2 months, and construction, if any, shall be completed within 4 months, from the date of the permit. This use shall be actually exercised at least 365 days each year, unless otherwise authorized in writing.

2. In consideration for this use, the permittee shall pay to the Forest Service, U.S. Department of Agriculture, the sum of ___ Dollars ($___ ) for the period from ___ 19 to ___ 19, and thereafter annually on Issued Free - Reg. 36 CFR 251.2

3. This permit is accepted subject to the conditions set forth herein, and to conditions 18 to 31 attached hereto and made a part of this permit.

DATE: 5/31/80

TITLE: FOREST SUPERVISOR

(CONTINUED ON REVERSE)
APPLICATION FOR RUBBISH DUMP PERMIT

(Sections 4371, 4372, 4373, 4374, 4375 Public Resources Code)

NAME OF APPLICANT: Mariposa County, CA

MAILING ADDRESS: Twp. 5 N., R. 18E

Located at/near: 2 miles north of Mariposa

and located in the SW 1/4 quarter of Sec. 9

County of Mariposa, State of California,
during the period Jan. 1, 1982 to December 31, 1983

1. THE TYPE OF DUMP OPERATED IS:
   (Check applicable block or blocks)
   ☐ Cut, fill and cover
   ☐ Fill and cover
   ☐ Accumulate and burn
   ☐ Burn continuously while dumping
   ☐ Other, (explain)

2. THE TYPE OF MATERIALS DEPOSITED IN THE RUBBISH DUMP GENERALLY CONSIST OF:
   (Describe) Garbage, tree trimmings, yard debris, metal products, tires, septic tank waste, carcasses of animals and ashes.

3. The distance from the periphery (outside limits) of the rubbish dump to the nearest adjacent property line is 400 feet. There are none buildings located within 150 feet of the periphery of the rubbish dump.

4. I understand that the rubbish dump permit which may be issued does not authorize the burning of dump or other materials without a burning permit as required by law, ordinance or regulation.

5. I have legal control of the above described land of approximately 55 acres in size through ☐ ownership, ☐ lease, ☐ rental agreement, ☐ other, (Explain).

6. I understand that an inspection of the premises will be made by a Forest Officer or Fire Official prior to the issuance of a permit.

7. I agree to comply with the conditions and terms of a Rubbish Dump Permit as issued to me.

When application is completed, return to

CA, DEPARTMENT OF FORESTY
5366 Highway 49 N.
Mariposa, California 95338

The statements given herein are true to the best of my knowledge and belief.

MARIPOSA COUNTY
SOLID WASTE
ORDINANCES
MARIPOSA COUNTY ORDINANCE No. 585

RESTRICTIONS ON SOLID WASTE
DUMPING IN MARIPOSA COUNTY

THE BOARD OF SUPERVISORS of Mariposa County does hereby ordain
as follows:

SECTION I: Section 8.36.150 is added to the Mariposa County
Code to read as follows:

"8.36.150 Dumping by other persons or entities. Dump-
ing of solid waste and refuse of any type in transfer sites
and dumps owned, controlled or operated by Mariposa County,
by any person or entity not expressly permitted under the
provisions of this chapter is prohibited and shall consti-
tute an infraction punishable under Chapter 1.20 of this
code."

SECTION II: Section 8.36.160 is added to the Mariposa County
Code to read as follows:

"8.36.160 Persons and entities permitted. The follow-
ing persons and entities are expressly permitted to dump
solid waste and refuse, in compliance with the regulations
of this chapter, in transfer sites and dumps in Mariposa
County:

A. Residents of Mariposa County bearing identification
establishing residency.

B. Owners of real property in Mariposa County bearing
identification and listed on the property rolls, and their
tenants, lessees and agents.

C. Commercial refuse collectors holding a valid permit
issued by Mariposa County under the regulations of this
Ordinance
Restricting So Waste Dumping

chapter.

D. Persons or entities who have entered into contracts or agreements with Mariposa County for the use of dump and transfer sites."

SECTION III: This ordinance shall become effective thirty (30) days from the date of final passage pursuant to Government Code Section 25123.

PASSED AND ADOPTED this 3rd day of August, 1982, by the Board of Supervisors of Mariposa County by the following vote:

AYES: Barrick, Dalton, Erickson, Moffitt, Taber
NOES: None
ABSENT: None
ABSTAINS: None

WILLIAM H. MOFFITT, Chairman
Board of Supervisors

ATTEST:

ELLEN BRONSON, County Clerk and Ex Officio Clerk of the Board

APPROVED AS TO FORM AND LEGAL SUFFICIENCY:

RICHARD K. DENHALTER, County Counsel
MARIPOSA COUNTY ORDINANCE NO. 409

The Board of Supervisors of the County of Mariposa do ordain as follows:

SECTION I:

All persons, firms, corporations, and their agents whose residences or places of business are within the boundaries of the County of Mariposa, shall be privileged to use the facilities of the various Mariposa County Sanitary Landfill operations for the depositing and dumping of refuse and garbage originating within the boundaries of the County of Mariposa.

No person, firm, or corporation, other than those above designated, shall enter into or upon the lands of the various Mariposa County Sanitary Landfill operations or use said Sanitary Landfill operations for any purposes whatsoever. No refuse or garbage except that originating in the County of Mariposa shall be placed in the various Sanitary Landfill operations.

SECTION II:

It shall be unlawful for any person, firm, or corporation or their agent having the right to use the various Sanitary Landfill operations in the County of Mariposa to deposit tires, tree stumps, household appliances of over eight (8) cubic feet and furniture of over eight (8) cubic feet, in any of the various Sanitary Landfill operation located at "Mariposa with the exception of the main Sanitary Landfill Site located in Mariposa. The Board of Supervisors may set out by Resolution a charge for the dumping of said tires, tree stumps, household appliances, or furniture at the main Sanitary Landfill site.
located in Mariposa.

SECTION III:

Persons under the age of 12 years are not allowed on the grounds of the various Sanitary Landfill sites of the County of Mariposa unless

a) accompanied by a parent or guardian, and

b) remain within the vehicle during the use of the Sanitary Landfill site.

SECTION IV:

If any title, division, chapter, section, subsection, paragraph, sentence, clause, or phrase of this ordinance is held invalid or unconstitutional for any reason by a court that decision does not affect the validity or constitutionality of the remainder of this code. The board of supervisors declares that it would have adopted each part of this ordinance irrespective of the validity of any other part.

SECTION V:

Violations of this ordinance shall be punishable by a fine not to exceed $200.00, or by imprisonment in the County Jail for a period not to exceed six (6) months, or by both fine and imprisonment.

PASSED AND ADOPTED by the Board of Supervisors of the County of Mariposa, this 25th day of November, 1975 by the following vote;

AYES: Clark, Dalton, Long, Hoffitt, Richardson
NOES: None
ABSENT: None
NOT VOTING: None

ATTEST:

TOM R. RICHARDSON, Chairman
Board of Supervisors

ELLEN BRONSON, County Clerk and Ex-Officio Clerk of the Board
ORDINANCE NO. 216

AN ORDINANCE ESTABLISHING MINIMUM FIRE REGULATIONS FOR GARBAGE DUMPS AND DISPOSAL AREAS IN MARIPOSA COUNTY, AND REGULATING DISPOSAL OF CARCASSES OF, AND/OR OFFAL OF, FISH, FOWL OR ANIMALS THEREIN.

The Board of Supervisors of the County of Mariposa do ordain as follows:

Section 1. It is unlawful for any person, firm or corporation to set fire to, or cause fire to be set to, any flammable material in or upon any garbage dump, or garbage or refuse disposal area owned, operated or maintained by the County of Mariposa, within said County, without the specific approval of the Board of Supervisors of the County of Mariposa, or its duly authorized agent, or without the specific authorization of the California Division of Forestry, or any authorized officer or agent thereof.

Section 2. It is unlawful for any person, firm or corporation to deposit in or upon, or cause to be deposited in or upon, any garbage dump, or garbage or refuse disposal area, owned, operated or maintained by the County of Mariposa, the carcass, or any part of the carcass, or offal, from any fish, fowl or animal, other than household or table refuse, or remains from fish, fowl or animals intended for human consumption, without burying the same at a depth and in a manner satisfactory to the Health Officer of the County of Mariposa.

Section 3. Every person, firm or corporation who, either directly or indirectly, violates or causes violation of the provisions of Sections 1 or 2 of this ordinance is guilty of a misdemeanor, and shall be punished by a fine of not to exceed Five Hundred Dollars ($500.00), or by imprisonment in the County Jail for a period not to exceed six (6) months, or by both such fine and imprisonment.

Section 4. The provisions of Sections 1, 2, and of Section 3 as applied to said Section 1, hereof, shall be effective immediately as an emergency measure. The facts not affect thereof are as follows:

The Board of Supervisors of the County of Mariposa hereby find that an extreme fire hazard exists in and about all public dumps and refusals, and garbage disposal areas in the County of Mariposa, and throughout the County of Mariposa, and that the setting of any unauthorized fire in or about such garbage dumps and garbage and refuse disposal areas during the existence of present hazardous fire conditions is a public nuisance.

Section 5. The provisions of Section 2, and of Section 3 as applied to said Section 2, hereof, shall become effective thirty (30) days after date.

Section 6. If any section, subsection, paragraph, or part of this ordinance is for any reason held to be invalid, unconstitutional or void, such decision shall not affect the validity of the remaining portions and provisions of this ordinance.

Section 7. A copy of this ordinance shall be published once in the Mariposa Gazette, together with the names of the members of the Board of Supervisors voting for and against the same, not later than fifteen (15) days after passage hereof.

PASSED AND ADOPTED by the Board of Supervisors of the County of Mariposa this 5th day of April, 1952, by the following vote:

AYES: McGregor, Jenkins, McCay, Miller, Schatz

NOES: None

ORDINANCE NO. 259

AN ORDINANCE FOR THE REGULATION OF GARBAGE AND REFUSE COLLECTION, TRANSPORTATION AND DISPOSAL.

The Board of Supervisors of the County of Mariposa do ordain as follows:

SECTION I. This ordinance shall be known and cited as the Refuse Disposal Ordinance of Mariposa County.

SECTION II. It is the purpose of this ordinance to institute within the County of Mariposa an orderly program for the collection, transportation and disposal of refuse and garbage in order to promote public health, safety and welfare.

SECTION III. As used in this ordinance, the following words or terms shall have the meaning defined as follows:

(a) "Disposal area" means any authorized site, location, tract of land area, structure or premises used or intended to be used for garbage or refuse disposal.

(b) "Authorized" means licensed or permitted under the laws of the State of California or ordinance of the County of Mariposa.

(c) "Garbage" includes all refuse accumulations of animal, fruit, vegetable or other matter that results from the preparation, use, cooking, dealing in or storage of food, meat, fish, fowl, fruits or vegetables.

(d) "Refuse" means rubbish and all refuse and waste matter other than garbage.

(e) "Refuse collector" means any person, firm, corporation or public or private agency or employee or agent thereof who is or intends to be engaged in the collection transportation, or disposal of refuse or garbage in the County of Mariposa.

(f) Any term not specifically defined in this ordinance shall be given its usual and customary meaning as the same is used in common parlance.

SECTION IV. No person, firm or corporation in the County of Mariposa shall accumulate or dispose of, or permit the accumulation or disposal of garbage or refuse on public or private premises in such a manner as to create a public or private nuisance or to injure or tend to injure or endanger public health or safety.

SECTION V. No person, firm or corporation in the County of Mariposa shall collect, transport or dispose of garbage or refuse in the County of Mariposa for consideration, either as a full-time or a part-time business or occupation, excepting in full compliance with the terms of this ordinance and the rules and regulations of the Mariposa County Health Department.

SECTION VI. Every person, firm or corporation who collects, transports or disposes, or who intends to collect, transport or dispose, of garbage or refuse in the County of Mariposa for consideration, must first obtain a license so to do from the Mariposa County Health Department. Before a license to collect, transport or dispose of garbage or refuse for a consideration may be granted by the Mariposa County Health Department, an application for such license must be filed, approval of the collection, transportation or disposal system or equipment must be obtained and the annual license fee therefor paid in full in advance.
SECTION VII. Every vehicle used or intended to be used for the collection or transportation of garbage or refuse must be in good mechanical condition, be equipped with a water-tight or leakproof bed or its equivalent which will prevent the leakage of liquids or fluids during collection and transportation of garbage or refuse, and must be equipped with a fixed canopy or a tarpaulin or other suitable cover which the health department finds capable of preventing spillage of refuse or garbage on public roads during transportation.

SECTION VIII. Every refuse collector shall pay to the County of Mariposa an annual license fee of $25.00. Annual licenses shall cover the period commencing July 1 and ending June 30 of the following year, except that original licenses issued following the effective date of this ordinance prior to July 1, 1966, shall cover the period commencing from the date of the issuance thereof and ending June 30, 1966. Thereafter licenses shall be issued and fees paid upon the fiscal year basis as above indicated.

SECTION IX. All refuse and garbage collected in the County of Mariposa shall be disposed of in a manner and location meeting the approval of the Mariposa County Health Department.

SECTION X. Every person, firm or corporation subject to the provisions of this ordinance shall dispose of refuse and garbage in either a public or private refuse disposal area specifically licensed or approved or operated by the County of Mariposa.

SECTION XI. Every refuse collector using county owned or operated refuse disposal areas for the disposal of refuse or garbage shall pay to the County of Mariposa the following fees for use of such disposal area:

(a) A refuse collector having fifty (50) or fewer customers shall pay a monthly fee of Ten Dollars ($10.00).

(b) A refuse collector having more than fifty (50) but fewer than seventy-six (76) customers shall pay a monthly fee of Fifteen Dollars ($15.00).

(c) A refuse collector having more than seventy-five (75) but fewer than one-hundred and one (101) customers shall pay a monthly fee of Twenty Dollars ($20.00).

(d) A refuse collector having more than one-hundred (100) customers shall pay a monthly fee of Twenty-Five Dollars ($25.00).

SECTION XII. The Board of Supervisors of the County of Mariposa reserves the right to establish one or more franchise areas within the County of Mariposa and to let either an exclusive or a non-exclusive franchise within any such franchise area pursuant to the provisions of Chapter 2, Part 2, Division 5 of the Health and Safety Code. No permit issued to a refuse collector pursuant to this ordinance shall be valid in a franchise area for which an exclusive franchise has been granted except the permit issued to the person, firm or corporation holding the franchise for such area.

SECTION XIII. The Board of Supervisors reserves the right to establish a schedule of maximum fees to be charged by any licensee or franchisee for the collection, transportation or disposal of refuse or garbage.

SECTION XIV. It is unlawful for any person, firm or corporation to place, deposit, or dump, or to cause to be placed, deposited or dumped, upon the right-of-way of any public highway, street, thoroughfare, or upon any camping place or public grounds, or on any privately owned premises without permission of the owner thereof, or into any lake or stream or dry watercourse within the County of Mariposa.
SECTION XV. The Mariposa County Health Department may deny, revoke or suspend any permit if the vehicle or vehicles, area or areas, equipment or other facilities for the collection, transportation or disposal of refuse or garbage fails to meet the standards set up by this ordinance, or rules or regulations of the Health Department adopted under the authority of this ordinance or any other county ordinance or state law for proper collection, transportation or disposal of garbage.

SECTION XVI. Any person, firm or corporation violating any of the provisions of this ordinance, or any lawful order, or the provisions of any permit issued hereunder, shall be guilty of a misdemeanor, and upon conviction thereof shall be punishable by a fine of not more than Five Hundred Dollars ($500.00), or by imprisonment in the County Jail for a period not exceeding six (6) months, or by both such fine and imprisonment.

SECTION XVII. Any government or governmental subdivision collecting, transporting or disposing of refuse or garbage shall be exempt from the license provision of this ordinance, provided that the Health Department finds that all equipment and disposal sites used by such government or governmental subdivision meet the requirements of this ordinance and any other applicable ordinances or State laws.

SECTION XVIII. Any person who is dissatisfied with any version or ruling of the Health Department on applications for permits or rules, regulations, directives or decisions of the Health Department may appeal to the Board of Supervisors, who shall have the power to grant or deny said application. Said application is taken by filing with the Clerk of the Board of Supervisors a notice of appeal within ten (10) days after the date of said decision or ruling. The notice shall be signed by the appellant or his attorney and shall be sufficient if it states in substance that appellant appeals from a specified decision or ruling. A notice of appeal shall be liberally construed in favor of its sufficiency. No later than thirty (30) days after receipt of said notice of appeal, the Board of Supervisors shall set the matter for public hearing and shall cause public notice of such hearing to be given by causing one notice thereof to be published in a newspaper of general circulation in the County at least ten (10) days before the date of said hearing. At said hearing, the appellant shall present a statement and adequate evidence in such form as the Board of Supervisors may require.

SECTION XIX. If any section, sub-section, paragraph, sentence, clause or phrase in this ordinance is for any reason held to be invalid or unconstitutional, such invalidity or unconstitutionality shall not effect the validity or constitutionality of the remaining portions of this ordinance, it being hereby expressly declared that this ordinance and each section, sub-section, paragraph, sentence, clause and phrase thereof would have been adopted irrespective of the fact that any one or more sections, sub-sections, paragraphs, sentences, clauses or phrases be declared invalid or unconstitutional.

PASSED AND ADOPTED by the Board of Supervisors of the County of Mariposa this 10th day of June, 1965, by the following vote:

AYES: Hurlbert, Gordo, Miller, Schatz
NOES: None
NOT VOTING: None
ABSENT: McGregor

s/ L. E. Schatz
Chairman of the Board of Supervisors of the County of Mariposa, State of California
ORDINANCE NO. 286

The Board of Supervisors of the County of Mariposa do ordain as follows:

1. The Board of Supervisors of the County of Mariposa may issue an exclusive or a non-exclusive permit to any person, firm or corporation authorizing the scavenging or salvage and removal of refuse, trash, metal, or any personal property deposited in or upon any dump or refuse disposal site owned or operated by the County of Mariposa. Such permit shall be in writing and may be in the form of a contract and may be revocable, or irrevocable for a specific period of time to be stated in the permit, and subject to such terms and conditions as the board may determine. A reasonable charge or other consideration may be exacted for the issuance of such a permit or contract. Any permit or contract issued prior to the effective date hereof, shall be deemed valid as though issued subsequent to the effective date of this ordinance.

2. Except as otherwise provided by law, any permittee may claim a lien for the cost of removal and storage of any motor vehicle, or part thereof, from any County owned or operated dump or refuse disposal site. Such a lien may be satisfied by a lien foreclosure sale conducted in accordance with applicable laws and administrative regulations of the State of California, but the County of Mariposa shall not be or become liable for satisfaction or payment on account thereof.

3. The County of Mariposa does not and will not guarantee or warrant title to any personal property removed from any dump or refuse disposal site by virtue of any such permit or otherwise. Removal of any such personal property shall not be deemed a sale or transfer from the County of Mariposa, and the resolution of any question of title to any such personal property shall not be the County's responsibility.

4. No person, firm or corporation shall engage in any act of scavenging or salvaging or removing refuse, trash, metal, or any personal property from any dump or refuse disposal site owned or operated by the County of Mariposa, where a sign prohibiting unauthorized scavenging or removal of refuse, trash, metal or other personal property is posted on or near the entrance to such dump or refuse disposal site by authority of the Board of Supervisors, unless such person, firm or corporation holds a valid, unrevoked permit or contract from the County of Mariposa authorizing such scavenging, salvage or removal.

5. Every violation of any provision of this ordinance is a misdemeanor, punishable by fine of not more than Five Hundred Dollars, or imprisonment in the County jail for not more than six months, or by both such fine and imprisonment.

PASSED AND ADOPTED by the Board of Supervisors of the County of Mariposa this 28th day of March, 1967, by the following vote:

AYES: Davis, Hurlbert, Long, Moffitt, Schatz.
NOES: None
ABSENT: None
NOT VOTING: None

HARRY F. HURLBERT
Chairman of the Board of Supervisors of the County of Mariposa, State of California.

GABRIELLE WILSON
County Clerk and Ex Officio Clerk of the Board of Supervisors, County of Mariposa, State of California.
ORDINANCE NO. 291

The Board of Supervisors of the County of Mariposa do ordain as follows:

SECTION I: Section XI of Ordinance 259 is hereby repealed and a new Section XI of Ordinance 250 enacted as follows:

"SECTION XI. Fees, Charges, Rules and Regulations:
(a) The Board of Supervisors may from time to time by Ordinance or by Resolution establish fees or charges to be imposed for the right to deposit garbage or refuse in any refuse disposal area owned, operated, or under the control of the County of Mariposa, and in like manner, alter, amend, or revoke the same. Such fees or charges may be made payable at any refuse disposal area to an authorized county representative, or independent contractor in charge of such refuse disposal area under contract with the County of Mariposa, and they may be retained by such contractor in lieu of wages or compensation for maintaining and operating such disposal area under such contract. Such fees and charges may be made payable to any County department, officer, employee, or independent contractor as the Board may determine. All fees and charges, except those paid to an independent contractor and retained by him in lieu of compensation for maintenance and operation of any such disposal site, shall be paid into the County treasury.
(b) Copies of any ordinance or resolution regarding fees or charges or regulations in effect at refuse disposal sites shall be maintained by the clerk and shall be open for public inspection during office hours of that office. Where fees and charges are to be collected at a refuse disposal site, a copy of the applicable schedule of fees and charges for that site shall be maintained at the site and available for public inspection at all reasonable times, or, in lieu thereof, a sign bearing the applicable fees and charges shall be posted in a conspicuous place at or near the entrance to said disposal site.
(c) All schedules of fees and charges heretofore established by ordinance or resolution of the Board are hereby expressly continued in effect until altered, amended, or revoked as herein provided.
(d) The Board may from time to time, by ordinance or by resolution establish such rules and regulations with regard to the establishment, maintenance, and operation of refuse disposal areas within the County of Mariposa as may be necessary or desirable in the interest of public health, safety, and welfare, and may in like manner alter, amend, or revoke the same.
(e) A licensed refuse collector shall not be required to handle any garbage or refuse collection container with a capacity in excess of 33 gallons or a weight, when filled with refuse or garbage, in excess of 85 pounds.
"

SECTION II: The Board of Supervisors hereby finds that during the spring and summer months large numbers of people, in excess of one and one-half million, visit Mariposa County as summer residents, as tourists, campers, hunters, fishermen, or in pursuit of recreation; that many of said persons visit Yosemite National Park and enter or leave Yosemite National Park via Highway 41; that the burden of provision of proper disposal of refuse and garbage within the County varies from area to area and in some areas of the County bears no reasonable relation to the population or taxable property within such areas of the County; that it is indispensable to the public health, safety and welfare of the inhabitants of Mariposa County and members of the public visiting in the County from outside the County of Mariposa to adequately provide for the establishment and maintenance of refuse disposal areas in the County; that it is necessary to impose fees and charges for the use of County-owned or operated refuse disposal areas in those portions of the County which experience the largest use by visitors from outside the County; that refuse disposal facilities formerly existing in the Wawona area within the boundaries of Yosemite National Park are no longer available for use; that the existing Fish Camp Disposal Area is inadequate to meet the needs of either the residents of Fish Camp and Wawona or the needs of visitors to that area; that the County of Mariposa is in the process of establishing and maintaining a new refuse disposal area, including an all-weather road thereto, to meet the refuse disposal needs of the residents of Fish Camp and Wawona and visitors to these areas; that it is necessary to impose fees and charges for use of the existing Fish Camp Disposal Area and the planned new Fish Camp Disposal Area in order to partially meet the costs of establishment and operating thereof. For the foregoing reasons, this ordinance shall take effect immediately upon its enactment as an emergency measure for the immediate protection of the public's health and safety, within the meaning of subdivision (d) of Government Code Section 25123 and of the Constitution of the State of California.

PASSED AND ADOPTED by the Board of Supervisors of the County of Mariposa, State of California, this 20th day of June, 1967, by the following vote:

AYES: Davis, Hurlbert, Long, Moffitt, Schatz

NOES: None
