I. Project Overview (FAC 7272.5)

Project Goals and Objectives (check all that apply):

- X Increase the profitability and value of crop land and rangeland
- X Decrease the costs of roadside, park, and waterway maintenance
- ___ Reduce the fire hazard and fire control costs in the state
- X Protect the biodiversity of native ecosystems
- X Maintain the recreational and aesthetic value of open space, recreational, and public areas
- ___ Increase water supply and flow

Project Activities (check all that apply):

- X Operation of programs by the county agricultural commissioner for control of noxious weeds along county roads and other local government owned property
- ___ Matching funds for control of noxious weeds on city owned streets, parks, rights-of-way, and other public areas
- ___ Disseminating biological control agents by the county agricultural commissioner for the long-term control of yellow starthistle or other noxious weeds
- X Abatement of noxious weed infestations on land vital to the success of the program

II. Project Plan

Weed Species to be Controlled: Noxious Weeds of Mariposa county including, but not limited to:

Yellow Starthistle- Centaurea solstitialis
Tocalote- Centaurea melitensis
Klamath Weed- Hypericum perforatum ssp. perforatum

Methodology:

Surveys will be conducted county wide using GIS/GPS units by Mariposa County Agricultural Commissioner (Mariposa CAC) staff. All data collected will be entered in CalFlora/ Collector app. Maps will also be created to help document the populations, locations, and treated areas.

Project one (Cost Share Project): Continue a cooperative cost share program (50/50 ratio) with local property owners to control the aggressive spread of Yellow Starthistle in the Merced River Canyon. Initial applications are submitted by landowners participating in the project. Mariposa CAC staff will conduct surveys and mapping to verify populations of weed species to be controlled. The project would continue a cooperative cost share program with 15-16 private landowners. Removal methods are established based on the growth stage and levels of infestation. All applications take place on privately owned property. Properly owners and pest control business enter into an agreement with each other, to perform applications. Once the applications are complete, landowners are reimbursed 50% of the cost of application. There is approximately 23 acres...
projected to be participating in the program for 2020. CEQA requirements met by issuance of a Restricted Materials Permit to private landowners and licensed pest control businesses.

**Project two:** Surveying and mapping locations of the Ferguson Fire boundary lines. Survey areas include private property and rights of way areas. Several species of noxious weeds were spread by fire control crews, other emergency personnel and environmental conditions created by the fire. Once targeted populations are determined, staff will use best management practices in efforts to determine the appropriate eradication methods of the weed species. Integrated pest management practices could involve: hand pulling, weed whacking, mechanical removal or chemical removables. All areas will be monitored for endangered/threatened species. All efforts will be made to protect them and their environment. If an application is proposed the licensed pest control business will obtain a restricted materials permit, before the application is made. CEQA requirements met by issuance of a Restricted Materials Permit to private landowners and licensed pest control businesses.

**Project three:** Survey other areas in Mariposa County for populations of noxious weeds. CEQA requirements not required for this project.

**CEQA Requirements:** All removal methods will be administered by a licensed pest control business operating under a restricted materials pesticide use permit (permit # 5530967) issued by Mariposa County Agricultural Commissioner office. All mitigation measures will be considered before a chemical application is made. Environmental conditions will be assessed to determine the best method of removal. Mariposa CAC staff will oversee the entire process. All applicable laws and regulations will be enforced to ensure compliance. Documentation of any environmental impacts, any feasible alternative or mitigation measures, or consultation with other agencies are included in the restricted materials pesticide use permit. By obtaining the RMP permit through Mariposa CAC, it satisfies any CEQA requirements.

**Location(s):** County wide with a focus on Merced River Canyon and Ferguson Fire burn scar areas. This will help protect the leading edge of the Stanislaus National Forest, Yosemite National Park and Sierra National Forest.

**Weed Removal/Control Techniques(s):**

Removal techniques will be based on the weed species to be controlled, terrain, levels of infestation or any sensitive sites. Methods to be considered will be: hand pulling, mechanical removal or chemical control. Herbicides will be applied by the contract pest control operator by ground rig, ATV, and backpack sprayer (predominately spot sprays), depending on the size and location of the infestation. All applications will be performed by licensed Pest Control Business California Reforestation. Products which may be used include: Garlon 4, Milestone, Transline, Accord or other products labeled for the appropriate weed species targeted.

**III. Reporting**

At mid-year progress a report will be submitted to indicate initial acreage/ miles to be treated, species of noxious weeds and levels of infestations. Final analysis goals are to determine the species of noxious weed populations, best management practices to control weed species and effectiveness of eradication methods currently being practiced. Detailed reports will be compiled documenting specific locations, species identified, environmental impact or concerns, removal method/s implemented, and amount of product used if applicable. Maps will be created to determine the spread or regression in areas of concern. Data will be evaluated to help increase the effectiveness in the eradication process in Mariposa County.
