

EVERYONE DESERVES TO HAVE A HEALTHY, SMOKEFREE HOME!

DID YOU KNOW?

People living in apartments are more likely to be exposed to secondhand smoke.¹

- » Smoke can enter your home through vents, electrical outlets, windows, and even tiny cracks in walls.

65%

Up to 65% of the air in an apartment can come from other units in the building.²

ANY AMOUNT OF SECONDHAND SMOKE CAN BE HARMFUL

- » **41,000 nonsmokers die** from secondhand smoke each year in the U.S.³

It is especially dangerous for children and can cause permanent damage to growing lungs.⁴

YOUR LUNGS CAN'T TELL THE DIFFERENCE

- » **Marijuana secondhand smoke is harmful just like cigarette smoke.**⁵ It has many of the same toxic chemicals that cause cancer and other diseases.
- » Vaping produces tiny droplets of harmful chemicals, including lead. **It's NOT just harmless water vapor!**⁶

TO FULLY PROTECT YOUR HOME FROM SECONDHAND SMOKE, YOUR ENTIRE APARTMENT COMPLEX NEEDS TO BE SMOKEFREE

This includes:

- » Inside units
- » On patios and balconies
- » Outdoor common areas such as pools, parking lots, stairways, and courtyards.

Free help to quit tobacco is available from the Kick It California.

YOU CAN MAKE A DIFFERENCE!

- » Apartment owners have the legal authority to make their property entirely smokefree. Contact your local health department for resources to offer managers and landlords about the benefits of a smokefree property.
- » Share information with neighbors about the harms of all forms of secondhand smoke. Try posting information on bulletin boards or in laundry rooms.
- » Reach out to city officials about local laws that would require apartments and other multi-unit housing to be smokefree.
- » Check the strength of your city’s smokefree policies and take action at www.secondhanddangers.org
