Continued Public Hearing to Adopt a Negative Declaration and a Resolution Adopting the Statutorily Required Five Year Update to the General Plan Housing Element (Continued from 12-16-03)

BOARD ACTION: Chairman Parker provided input on the hearing process and advised that information may not have been available for timely review by the public and that some of the changes requested by the Board may not have been made to the Housing Element. Tom Guarino, County Counsel, noted that some of the information may not have been available, and that there is a timeframe to complete the process, and he recommended that the hearing be continued. Chairman Parker noted that section 8.14 of the draft was not reviewed by the Board during the workshops and he asked whether input should be taken at this time on that section as it is included in the materials presented for this hearing. Eric Toll advised that there was a cut-and-paste error relative to including section 8.14, and he also noted that a portion of the section was deleted based on a conversation he had with Don Starchman. Discussion was held and Supervisor Balmain and Supervisor Bibby noted that they had marked several pages that need corrections and several pages with typographical errors that they would share with staff. Staff responded to a question from the Board relative to the wording in the resolution concerning the statutory requirement to adopt the Housing Element by December 31st and whether an explanation should be added. The Board concurred with deleting that paragraph.

The public portion of the hearing was opened and input was provided by the following:
- Don Starchman asked about section 5.13.01 Seasonal Employee Housing, and he suggested changing “must” to “should” in the last paragraph. Discussion was held relative to removing the sentence in question. Chairman Parker noted that this section was a part of section 8.14 in the draft Housing Element that was reviewed during the workshops and he advised that the Board did not review this section. Ken Melton commented on reference to the concessionaire and Park Service and questioned whether this should be covered here. Eric provided input relative to the Board’s review and deletion of the previous section.

Discussion was held relative to the letter received from the National Park Service relative to the Park’s employee housing needs. The Board concurred that there would be a continued open and positive dialog with the Park, and that there isn’t a need to specifically address this section.

The Board concurred with adding the third paragraph back in section 5.13.02 Housing and University of California/Merced which was inadvertently omitted.

Chairman Parker advised that public input would be taken, and that the public portion would remain open for additional input on January 13th.

Input from the public was provided by the following:
- Lowell Young stated he feels that encouragement of passive solar and solar-type roofs should be added to section 5.11.05 Housing Objectives and Programs in Objective Six: Minimizing Housing Costs by Reducing Energy Use.
- Ken Melton provided input on the following section: 5.10.03 Progress in Implementing Housing Element Programs, section 7.7, and stated he does not feel that day care should be mandated. Eric Toll advised that this is not in the new revised Plan.

Supervisor Bibby asked about the removal of section 8.14.01 in the previous version of the draft Plan based on a request from the public versus direction of the Board; and she asked about the Housing and Community Development (HCD) Agency’s review of the Plan. Eric Toll responded and advised that the section was removed based on Board direction to not reference the General Plan Update, and that HCD reviewed the Plan.
Supervisor Balmain asked about the statement in the staff report that no comments were received directly related to the Housing Element, and Eric advised that he will clarify the statement to reflect that no comments were received during the Planning Commission’s review. Supervisor Balmain noted that the December 13th date needs to be changed in No. 13 of the staff report to reflect the January 13th adoption date. He asked whether there are any “publicly owned” rental developments as referenced in section 5.4.02 Economy/B. Income, and it was agreed to change the sentence to reflect “privately owned” rental developments. In section 5.10.03 Progress in Implementing Housing Element Programs, No. 7.4, it was agreed that the end of the last sentence would read “…an array of services could exist in the future.” Direction was given to correct the sentence structure in section 5.11.05 Housing Objectives and Programs/A(2) Programs/section 1.3. Supervisor Balmain asked about explaining the term “fair share” in Objective Three: Providing Adequate Sites and Services; clarifying Objective Four: Maintenance, Rehabilitation, and Replacement of Existing Housing Stock/D(1) Findings relative to substandard housing being the result of housing being built over a long period of time and falling into disrepair; and the Board concurred with deleting the second sentence in Objective Seven: Increasing Home Ownership Opportunities/G(1) Findings.

Chairman Parker continued the public hearing to January 13, 2004, at 11:00 a.m.; requested that a clean copy be provided for everyone; and he clarified that more public input would be taken at that time.

Eric Toll advised that the Department’s workload is starting at a brisk pace for 2004.

Water Supply, and the Board concurred with this change. She also stated that she would like to further discuss the mobile home issue.
- **Supervisor Stetson** requested that a box be added to Table 5-8 for Mountain Home and Rural Residential. He requested that the last portion of the sentence in “K” under section 5.11.04 Mariposa County’s Housing Policies, be deleted; and the Board concurred with deleting “…achieving County housing goals, policies, and objectives.” The Board concurred with deleting “as its” in section 1.3 of 5.11.05 Housing Objectives and Programs/A(2) Programs. He referred to section F. Objective Six: Minimizing Housing Costs by Reducing Energy Use/F(2) Programs/6.2 and requested that the consideration be given to what the County is doing with public buildings now and in the future relative to passive solar design. Eric stated he thought the Planning Commission included this in another element.

The public portion of the meeting was opened and input was provided by the following:

- Ken Melton reviewed the following portions of Section 5.11.05 Housing Objectives and Programs where he thought changes had been made by the Board that were not reflected in the final draft:
  - **Objective One/A(2) Programs/1.2** – he thought that “Building Department” was removed from this section. No change was made.
  - **Objective Two** – he thought that “very” was removed and there was a question about the rest of the sentence. No change was made.
  - **Objective Two/B(1) Findings** – he thought that “provided” was changed to “identified”; and the Board concurred with this change.
  - **Objective Two/B(2) Programs** – he thought section 2.1 was removed. No change was made.
- Objective Two/B(2) Programs – he thought that reference was deleted to the 25 percent density bonus, and the Board concurred with this change.
- Objective Three – he thought the wording “within performance zoning” was removed and reference to “Planning Areas” was changed to “Town Planning Areas”; and the Board concurred with these changes as previously directed.
- Objective Three/C(2) Programs/3.1 – he thought there were changes made to delete “provisions” at the end of the first sentence, and that “update: was changed to “review”; and the Board concurred with these changes as previously directed.
- Objective Three/C(2) Programs/3.2 – he thought “Planning Areas” was changed to “Town Planning Areas” and that “Planning Department” was changed to “County”; and the Board concurred with these changes as previously directed.
- Objective Five/E(2) Programs/5.3 and 5.5 – he thought there were wording changes in these sections relative to the application of funds from State and Federal programs and relative to the use of nonprofit, for-profit organizations. Susan Crain, Planning Commissioner, provided input on the Board’s previous review and discussion of these sections. No further changes were made.
- Ken initiated discussion relative to the last paragraph in section 5.13 Housing Issues Unique to the County of Mariposa/5.13.01 Seasonal Employee Housing. He stated he feels there should be changes in this section. Discussion was held and the Board concurred with further reviewing this during deliberations.
- Gene Mickel stated he does not feel that alternative energy should be limited to solar in the document.

Further discussion was held relative to section 5.13.01 Seasonal Employee Housing, and the Board concurred with Supervisor Stetson’s suggestion to change the end of the first sentence to read as follows: “...and the rest of the tourism industry as seen as a collective employer.” Don Starchman stated he feels the sentence should be deleted in the middle of the last paragraph relative to housing for seasonal workers, pursuant to previous discussion by the Board. Supervisor Pickard clarified that this section does not create any obligation. Ken Melton stated he feels that “should” can be interpreted as a requirement. Discussion was held by the Board. Supervisor Pickard suggested that the sentence be reworded as follows: “Housing for seasonal workers should include adequate infrastructure and when possible access to community services.” The Board concurred with this change.

Supervisor Bibby requested that there be further discussion relative to mobile homes and safety issues. Discussion was held and it was agreed that due to the timeframes for adopting this element that other issues could be further discussed in the future. Supervisor Parker noted that this is an interim Housing Element to meet the timeframes for adoption, and a final Element will be done in the future. He also requested that the Clerk pull information on the Board’s previous discussion of the mobile home issue for the Board members.

Tom Guarino, County Counsel, advised that the ‘whereas” clauses in the formal resolution need to be revised to reflect that this is an “interim” document, and the Board concurred with this change.

The public portion of the hearing was closed. (M)Stetson, (S)Pickard, Res. 04-21 was adopted adopting the General Plan Housing Element with the changes as discussed, including the use of “interim Housing Element” in the formal resolution language/Ayes: Unanimous. The hearing was closed.

Doug Balmain, Board of Supervisors, Vice-Chair;
Discussion Relative to Possible Amendment or Revision to the County’s Equestrian/Pedestrian Easement in the Don Pedro Area

**BOARD ACTION:** Supervisor Balmain advised of request to pull this item; however, he stated he feels there was a misunderstanding about what this item is addressing. He presented background information relative to the creation of the trails and subsequent problems with encroachments. He stated he feels the trails should be surveyed, the encroachments identified, and the terrain reviewed to determine the usefulness of portions of the trail and possibly consider dual use. Discussion was held. Dana Hertfelder/Assistant Public Works Director, advised of estimates that they received for conducting a walk-through survey to determine where there are encroachments within the easements – about $10,000; and for an outside survey of the trail system that would include identifying areas needing improvements and the type of improvements ($90,000). Discussion was held relative to possible funding sources and whether the project would be eligible for Proposition 40 funds. Rich Begley/PWD-Deputy Director of Parks and Recreation, provided input relative to the requirements and timelines for Proposition 40 funds. Motion by Balmain to take up to $10,000 from the General Fund Contingency to start the project of identifying the trails and encroachments, with a request for Public Works to help identify optional sources for funding, was amended following further discussion. (M)Balmain, (S)Pickard, direction was given for staff to bring back an item to allocate funding from the General Fund Contingency to start the project of identifying the trails and encroachments, with direction for Public Works to identify the costs and possible funding sources. Further discussion was held relative to equestrian/pedestrian easement issues in the Don Pedro area. Input from the public was provided by the following:
Edward Ibarra stated he has been a resident for ten years and has over forty years of horse experience, and experience with other trail systems. He stated he feels this system is second to none. He feels that no or very little construction is needed, and that portions of the trails need to be abandoned because they are dangerous and a liability to the County. He stated he feels that the trails need to be marked and cleared. He noted that the trail goes across Highway 132 and roads and private drives, and there has not been a problem of livestock versus vehicle. He advised of his contact with the Outdoor Horsemen’s Association and their interest in this trail system during the winter months when the trails at the higher elevations are not passable.

Harry Alfier stated he is the owner and Broker of Lake Don Pedro Realty. He referred to the ordinance that prohibits the use of any motorized vehicle on the trails, and the Covenants, Conditions, and Restrictions for the subdivision that contains a provision for dual use of the trails, including vehicles.

Orb Hatton, Director for Lake Don Pedro, advised of the history of the trails and changes with development of the area. He stated he feels the trails need to be identified and cleared; and where the terrain does not permit, the trail should be abandoned. He stated the trails are a big part of the community.

Joe Haden asked about a rumor that the trails would be opened up for off-road vehicle use, and he was advised that this is not the case.

Wes Snyder stated he has been in the subdivision for 34 years, and he advised of his efforts to mark the trails and work on these issues. He stated he is okay with revisions to allow ingress and egress for access for private property owners. He stated he feels the trails should be marked and sections abandoned that are not needed. He volunteered to assist and obtain assistance of others to work on these issues.

Tom Porter provided information on the history of the trails and access to the lots. He stated he feels there should be a change to allow motor vehicles to traverse for ingress and egress when no other viable access is available.

The motion was clarified – direction is given to staff to identify alternative funding sources to identify the trails in the subdivision and the encroachments and utilities. Ayes: Unanimous.

She stated that it is felt that the Administrative Office does not follow the same rules as set for departments, and she stated she feels these changes should be requested in the budget process. She referred to the classification and compensation study and its status in relation to this proposal.

- Kristy Waskiewicz, AFSCME, Local 2703, stated she opposes the proposal and supports the comments made by SEIU. She referred to the classification and compensation study and the process, and stated she has issues with the timing of this request and the cost analysis that was provided. She noted that the Administration Department has been upgraded a few times in the last few years and none of these positions were identified in the classification study as needing any adjustment, and other positions have been waiting for over a year. She stated she feels this is an equity issue, and she stated she hopes that the County will follow the appropriate recruitment and selection process for the new positions.

Discussion was held relative to the request and the input that was provided, and Rich advised that if a department head brings a plan to him like this, he will bring it to the Board. Supervisor Bibby asked about the processing for the job descriptions and requested that all classifications go through the classification and compensation study in the future. She asked for clarification of the minimum requirements for the new positions, and she reviewed a list of tasks that she was hoping that the personnel director would accomplish, and stated she feels that personnel services should be expanded. **10:52 a.m.** Recess

**11:09 a.m.** Sarah Williams, Interim Planning Director; Discussion and Possible Direction to Staff Regarding Development Proposals Accessed by Narrow County Maintained Roads

**BOARD ACTION:** Sarah Williams presented background information to this issue and the definition they are using for “narrow County maintained roads.” She advised of recent land division applications with access off of Old Highway and issues with the status of the road. Supervisor Bibby asked about the status of historic parcels with this review.

Input from the public was provided by the following:

- Mark Lamb, Coulterville, advised of the status of his application for a minor split – he stated he is adding two drives and the road in front of the property is twenty-feet wide. He noted that he submitted his application on October 17th and he is still waiting for a decision. He stated he is trying to split the property so that his children will have a place to live. He also noted that the off-road vehicle park, located about four miles up the road, has more of a traffic impact than minor subdivisions.

- Bill Tucker advised that the Mariposa Indian Council would like to be contacted when there are changes with utilities and when subdivisions are created so that they can protect the Indian artifact areas. Sarah Williams advised that all projects are sent to the Council for review and comment.

- Mrs. Verceles of West Whitlock Road expressed concern with maintenance of the road, and she noted that there is a bull pine that is leaning over the road and needs to be removed. Supervisor Pickard clarified the purpose of today’s discussion.

- Peter Thomas stated he is a resident of Santa Cruz and recently purchased property here on Whitlock Road. He advised of his investigation to make sure that the property could be subdivided before he finalized the purchase, as that is the only way they could afford it. He advised that escrow closed and they are in the middle of the land division and this issue of development proposals accessed by narrow County maintained roads was raised. He requested that they be exempt from consideration of future policy.
Discussion was held relative to placing applications on hold. Sarah provided input relative to the CEQA requirements. Bill King/Senior Planner, provided additional input on the CEQA requirements.

- Mark Cacioppo stated he is involved in the subdivision in Catheys Valley and the property is zoned for five-acre minimum. He noted that a lot of people are beginning to divide and split off historic parcels to be able to have income. He advised of the traffic study that they did, and he stated he feels people need to keep in consideration the size of a five-acre parcel. He also stated he does not feel that this is a problem that just got here.
- Blaine Sturtevant, of Coulterville, stated he feels that improvements should be made to the roads with all subdivisions.
- Ken Melton stated he agrees with not holding up projects for consideration of future changes. He noted the CEQA requirements are not new; however, he feels the interpretation of the requirements is new. He stated the California Department of Forestry and Fire Protection (CDF) regulations are written to apply to future construction; and construction that occurred prior to 1991 does not fall under the PRC 4290 requirements. He referred to existing roads that do not meet standards, and noted that there has been no problems. He also noted that when a road is improved to meet the PRC 4290 standards, people drive faster and the accidents are more severe. He stated he does not feel that traffic studies should be necessary, as the information is already known. He also noted that there are a lot of existing parcels that will be developed and they will not have to pay anything to improve the roads; but if someone does a minor split, they would have to pay. He stated he feels that most of this issue has to do with maintenance of the roads. He suggested that a maintenance fee be charged to each parcel that accesses a County road; that way everyone would be treated the same.
- Barry Brouillette stated he agrees with almost everything stated by Ken Melton. He also referred to Sarah’s comment that winding roads are a part of our character; however, he feels we will need to look at improvements along some of the roads. He suggested that there be an assessment of what needs to be done for improvements, and then a review of how to develop fees to cover the maintenance. He noted that the CDF regulations are statewide; however, he feels it should be based on local policy.
- Dennis Townsend, CDF Law Enforcement Chief, stated he is charged with enforcing PRC 4290. He presented background information on this history of these regulations. He stated the infrastructure is not improving for development that occurred prior to 1991, and he feels that they have recognized that they are closing the gap on the acceptable level of risk. Discussion was held relative to the input that was provided. Supervisor Bibby asked whether mitigation measures exist in other counties. Dennis advised that he will review the mitigation issue and bring something back.
- Paul DiTomaso provided input on his subdivision process. He advised that he closed escrow after he received assurances from all parties that everything was okay. Then he received a letter from the County expressing concern with the road. He spent $8,000 on a traffic study and the subdivision has been delayed and is costing him daily.
- Robert Brockman stated he lives on Old Highway across from the property that is being developed. He commented on the near-accidents that he has encountered on the road, as well as those that travel at a high rate of speed. He stated he feels the road is falling apart. He feels that if people are willing to fix the road, then it would be okay for them to develop.
- James Kidd stated he is a resident on Old Highway, and he has had a few near misses. He stated there is not a lot of traffic; however, he feels that the road is dangerous. He also stated that he feels the issue of the road is just part of the development of the community, as well as many other issues; i.e., water, sewage, law enforcement, schools, fire, etc. He stated he feels that a multitude of minor developments increase the impacts affecting the area and increase the pressures on the roads.
- Mark Cacioppo advised that their traffic study took into consideration full build-out on the road; and he introduced Amy Fisher, traffic consultant for their project.
- Amy Fisher, Verba Technology, a traffic consulting firm in Fresno, noted that there are a lot of roads in the State with problems, and she noted that Highway 140 has its problems. She suggested that the deficiencies be analyzed to establish a region-wide traffic impact fee program.
