Discussion and Direction to Staff Regarding the Operation of the Auditors Department (Supervisor Pickard, District V)

**BOARD ACTION:** Supervisor Pickard advised that he placed this item on the agenda as there are concerns about the operation of the Auditors office and the status during the Auditor’s departure. He advised of a letter that was received from the Auditor that he asked County Counsel to distribute to the Board members; and he advised of a note that was left on the desk of staff in the Auditor’s office. He expressed concern that the budget has not been completed and the schedules are technical in nature. He stated there has been rumors about the possible resignation of the Auditor and the Board has not been informed of any definite plans of when or if this is going to occur. He also advised that there is a concern that documents may have been disposed of without permission of the Board. He requested that County Counsel and the County Administrative Officer approach the office and check on the status of the operation and report back to the Board, and he requested that this matter be scheduled on October 25th. He also noted that there is an issue of whether the Auditor still meets the legal residency requirements. He further explained that since this is an elected official, the statutes require that discussion be held publicly.

Supervisor Stetson stated he agrees with asking the Auditor what his intentions are; however, he does not wish to entertain rumors.

Supervisor Bibby advised of an additional letter that was received from the Auditor relative to his vacation plans and leaving local address information, and she advised that there was a memorandum to staff with instructions for completing the last portions of the budget. She stated she would like to know more facts about the rumors that files were discarded. She stated she feels that the public should be provided with the entire backup information on this matter, she finds it is ironic with respect to the timing of the two invoices and donation ($500, $500, and $10,000); and she also stated that she has concerns with respect to the timing of this issue with the Auditor. She also noted that the Chairman has been meeting with a potential replacement for the position, and she questioned whether that is appropriate without knowing the status of the position; and she feels that when the position is vacant, that there should be an open recruitment. She questioned recent invoices that were submitted for payment for an alcohol expense for the RCRC conference and for a $10,000 donation to the UC Merced.

Supervisor Pickard advised that his conversation with a potential candidate was some time ago when it was originally rumored that the Auditor was going to resign this month. He stated he feels that the contact was appropriate to encourage the candidate to apply when the position became vacant.

Rich Inman, County Administrative Officer, advised that Mariposa County sponsored the RCRC conference and sponsors were solicited to pay for the alcohol invoices, and that a note was sent to the Auditor explaining the situation. He further advised that the invoices were not paid with public money. Rich provided input on his understanding of the purpose of the promotional line item in the Tourism budget, and he noted that funding was provided last year to the Outdoor Writers Conference that was held in the County. He commented on his decision relative to providing a donation to the UC Merced for its opening celebration and of the importance of the UC to the County. He suggested that if there are concerns, that perhaps a broader discussion should take place on how these funds are used.
Supervisor Bibby further commented on the donation to UC Merced, and stated she feels that this request should have come to the Board. She also questioned the process for soliciting the donations for the alcohol for the RCRC conference. She requested that issues that are potentially controversial, involve a large sum of funds, or are represented on behalf of the Board, come to the Board for action. She also expressed caution on taking action regarding an elected official unless there is a criminal act.

Supervisor Pickard advised that the “clarifying” letter was received from the Auditor after this matter was placed on the agenda. He also commented on the benefits of the County hosting the RCRC conference and donation of proceeds from the raffle of baskets from the counties, and relative to supporting the UC Merced. He stated he agrees with having a broader discussion of the use of the promotional line item, and he asked the County Administrative Officer to schedule that discussion. He asked that the Board discuss providing direction to staff relative to the operation of the Auditor’s office. Supervisor Bibby asked that the discussion be continued for when the Auditor returns. Further discussion was continued for the following hearing to be opened.

10:24 a.m. The public hearing to approve the environmental documents for the Mariposa Creek Parking Project #05-05 was opened and continued until after the following item.

Further discussion was held relative to the request to provide direction to staff relative to the operation of the Auditor’s office.

Input from the public was provided by the following:

Jill Ballinger, Mariposa Gazette, asked County Counsel to provide the Government Code that addresses how elected officials are replaced. She asked for a list of the individuals that were solicited to participate in donating items for the RCRC baskets. She also asked Supervisor Pickard if he called Ken Hawkins, Auditor, before placing this item on the agenda.

Ruth Sellers stated she is pleased with Ken Hawkins and would like to defend him, and to thank Supervisor Bibby for being honest and keeping the citizens informed. She questioned if this is going to be the practice of the Board to question when an elected official goes out of town.

Jim Allen, Sheriff, stated he was speaking from an elected official’s position; and he asked that if there is going to be something from the Board relative to elected officials going on vacation, he would like to be advised. He also asked that direction be given to the Board or County Counsel to meet with the department head in this matter, and not with staff, to give him a courtesy opportunity to provide input.

Tom Guarino, County Counsel, advised that the Board is vested with responsibility, should a vacancy occur in an office, to appoint someone. He also noted that the individual in the office creates a vacancy and not the Board. In this case, a note was left that left an address in Kentucky and there was confirmation that the elected official sold his residence and that escrow had closed. He advised that Government Code Section 1770 addresses the residency requirements and things that constitute a vacancy of the office. He provided further input on the residency issues, and stated the question that needs to be addressed is whether the Auditor vacated his office by his own actions. He stated he feels that the Board needs to give direction to the County Administrative Officer and County Counsel to ask the Auditor as to whether it is his intention to remain a resident as defined by the Government Code.

(M)Stetson, (S)Turpin, direction was given to the County Administrative Officer to get in touch with the Auditor and ask him the following: 1) when he is coming back; 2) whether the budget is going to be completed timely; and 3) what is his intention relative to resigning. Supervisor Stetson stated he feels that this discussion could be held next Tuesday, if necessary. Further discussion was held. Supervisor Bibby stated she would like to have all of the information relative to the concerns that have been mentioned. Supervisor Fritz stated she would like to hold this discussion until the Auditor is present and can be asked these questions directly.

John Croll noted that the Board has been discussing this issue for an hour and one-half, and much time has been spent on innuendo and rumor and not facts, and he feels that there are other important issues that the Board should be addressing. He stated he feels that the public has a poor image of the Board, and that the Board should be looking at facts.
Supervisor Bibby asked for clarification of the motion, that it does not require the Auditor to be present for the continued discussion. Supervisor Pickard stated he feels that the motion needs to go further. Ayes: Stetson, Turpin, Bibby, Fritz; Noes: Pickard.

5:10 p.m. The Board reconvened with Supervisor Fritz excused for the rest of the meeting. Chairman Pickard announced that direction was given to staff as a result of the closed session.

Kris Schenk, Planning Director;

BOARD ACTION: Kris Schenk presented the staff report, he reviewed the process and purpose of this hearing, and he advised that the comment period is open until November 15, 2005. He noted that some comments have already been received. He further advised that Sarah Williams, Deputy Planning Director, will keep notes of the comments that are that are made during the hearing; and he advised that Bob Duchek, Parsons consultant, is present to assist in the process.

Staff responded to questions from the Board relative to distribution of the comments that are received. Chairman Pickard asked that if the Board members receive any comments that they be provided to the Clerk of the Board for distribution. Kris Schenk advised of their use of yellow and green paper for separating the comments between the draft EIR and the Plan Update. Chairman Pickard reviewed the hearing procedures; and he advised that public comments would be taken on the draft EIR and then on the Plan Update.

Input from the public on the draft EIR was provided by the following:

Tolley Gorham stated that when he asked a question about the possibility of the Catheys Valley town planning area boundary not being changed and how that would impact the DEIR, he was told that there are alternatives built in that would take into account not changing the boundary. However, he could find very little in the alternatives as to what the consequence would be in terms of the DEIR. So he is concerned that if a town planning area is not in final format, then the DEIR might become a stumbling block or have to be re-reviewed in order to make this happen. He referred to Section 4, Air Quality, and noted that the DEIR recommends policies to regulate airborne pollutants from various sources; however, he noted that the County chooses not to participate in the California smog testing program.

Kris Casto referred to the sentence on page 2-26 relative to “all road improvements,” and she stated she feels that road improvements should be defined and not be included under work defined as “road maintenance.” She stated she feels this should also include reference to preserving scenic vistas and rural character. On page 4-17, relative to preparing and implementing a program that would assess development impact fees, she is hopeful that there is public input and discussion on the impact fees and that the community could discuss road improvements. She referred to handicapped access, and stated she did not find any reference in the document. She feels that there should be a sentence included that states that we are aware and will see that this is addressed in new construction. She noted that this should also be an important part of any construction done by the County.
Dick Kunstman, member of MERG and Conservation Chair for the Yosemite Area Audubon Society, stated the DEIR speaks of environmental protection being too aggressive; however, he could not find any arguments that this is the case. He also stated he does not understand the necessity to separate comments on the DEIR from the Plan. He noted that in the Plan that County residents stated they do not want to see urban sprawl; however, he feels that when you look at the Plan itself, that it is a sprawl-master’s “wish list.” He feels that there are many things that could make the Plan better.

Paul Chapman referred to agri-tourism and a memorandum from the Department of Conservation and he noted the act of visiting does not constitute ag use. He stated he feels that the Plan should differentiate the ag uses, i.e., agri-tourism and agricultural production uses.

Steven Fortner stated he has been trying to “master plan” their property in Catheys Valley for the past ten years. He stated he feels that the General Plan Update should be discussed before the DEIR. He also stated that he intends to provide more written comments before the November 15th deadline. He noted that the Guiding Principles state that we are one County; however, there are eleven planning areas. He does not see any reason for expanding the town planning areas beyond the existing borders as they were identified in the 1981 Plan. He referred to the statement that the County’s economy is a partnership, and yet when someone wants to come and invest in the County, he does not feel that they are given any respect. He feels the General Plan creates more non-conforming zoning than it eliminates. He stated he feels that the alternatives in the DEIR are inadequate. The “no project” alternative says the County could go from 20,000 to 80,000 people, and he questioned where all of these people go in the proposed project. He stated he does not feel that five-acre parcels spread throughout the County is effective planning. He stated that he feels that the DEIR is deficient in complying with State law with regard to open space. It does not effectively deal with jurisdictional waters and wetland issues, and he referred to the impact these issues have on the development of his property. He stated he does not find any backup to the different alternatives about the population assumptions. He stated he would like more clarification of the difference between the current zoning for town planning areas and what is being proposed, and he commented on the planning process for the Catheys Valley area. He stated he does not feel that the local town planning groups should control planning, that the Board is responsible. He stated he supports economic development, but is not that hot on residential growth.

Ken Baker stated he represents several property owners in Catheys Valley. He stated he does not feel that the alternative section covers any changes that may need to be made, and it should include that possibility. He stated it appears that the decisions have all been made, and that there is no latitude for any exceptions, in the alternatives. He gave an example with the Catheys Valley town planning area, and he asked if the TPA was left alone and then surrounded with a community plan, whether this could be considered. Bob Duchek explained the purpose of the analysis of the DEIR, and he advised that the alternatives are intended to establish a range of alternatives. But this does not prohibit other alternatives from being considered that are not specifically addressed in the DEIR, as long as they fall within that range. Ken Baker continued with his comments, and stated he encourages and supports moving the General Plan Update forward. Bob Duchek clarified that the DEIR is adopted as an information document and action to certify is that it adequately addresses the impacts. Ken Baker noted that he can not remember doing the Plan first and then the EIR. Chairman Pickard commented on the previous process of reviewing the General Plan Update.

Bob Duchek responded to a question from the Board relative to the process for doing a supplemental EIR.

Supervisor Turpin asked about providing text corrections. Kris Schenk suggested that the changes could be provided with the public comments or at the end with deliberations.

Public input was provided by the following on the General Plan:

Tolley Gorham referred to his written comments. He asked that the designation of ‘town planning area” be reinstated for Catheys Valley, and that the proposed area of community planning area be deleted. He asked that the current Catheys Valley Planning Advisory Committee members resign, and that a new committee be formed. He asked that the Planning Department be directed to allow project approval within the existing town planning area based on currently allowed zoning. He asked about the approval date for the existing TPA’s, and he noted that the Whispering Oaks development is as large, or
larger than some of the planning areas. He noted that the document identifies a goal to eliminate rural sprawl, yet allowing five-acre minimum-sized parcels throughout the Hornitos Road and Schoolhouse Road corridors would seem to ensure this type of undesired growth. He noted that the Catheys Planning Advisory Committee does not have any members who are current TPA residents or landowners, so their positions may not represent the positions of the property owners in the TPA. The Agricultural Advisory Committee is made up of representatives of the agricultural community, thus agricultural community input is provided on those issues. He doesn’t feel that this makes sense. He asked for clarification of section 2.3.03 relative to implementing plans and policies in the document and whether that means that no further input will be considered. He noted that developers are willing to follow the rules, but that is difficult when the rules are not clear. He questioned why growth is not being encouraged in Catheys Valley given the potential with the availability of land and development of infrastructure. He stated he feels that the Plan will down-zone the property in the Catheys Valley TPA from 2.5-acre minimum lot size to 5-acre minimums, and this is not promoting the property owner’s right to use the development process to achieve the highest and best use of a property. He commented on the amount of housing that may be occupied by staff and students of UC Merced, and he stated he feels that it would make sense to begin making plans to allow these people the opportunity to live in Catheys Valley. He referred to the “ready to build” issue, and he noted that a privately-owned water system exists in Catheys Valley. He again referred to the Catheys Valley Planning Advisory Committee and commented on the planning process and conflicts. He referred to land use planning maps that have been developed that will change the zoning for the Catheys Valley area. He advised of a correction to reflect that the Mariposa Pines Mutual Water Company is privately-owned, and again noted that there is a privately-owned water system in Catheys Valley. In regard to the Technical Background Report, he referred to the property tax assessment breakdown and he noted that the income from agriculture is a small percentage. He stated he realizes that agriculture is important; however, he feels we need to look at who pays the bills. He noted a correction to the reference of Whispering Pines and Whispering Pines West subdivision, and advised the names are Whispering Oaks and Whispering Oaks West. He also noted the Quail Ridge subdivision is located on Darrah Road, in the Bootjack planning area. He stated he feels that the modest homes and mobiles in need of rehabilitation are primarily located along Schoolhouse Road, Hornitos Road, and Highway 140 on parcels with no community controls such as the CC&R’s found in most subdivisions, and he feels the adoption of the Catheys Valley Community Plan will ensure that this scene is the norm.

Betty Boykin, MERG, noted that residents have witnessed the impacts of rural sprawl in neighboring counties, and they feel that our environment is our most important issue. She advised that they have reviewed the Plan and find many features that will help preserve our rural character. However, they have some concerns. They do not support conversion of large parcels to smaller parcels on dirt roads with no services. They support maintaining large parcels to create open space and a separation between communities. They feel that the spreading of the community from the Fairgrounds area to the Airport appears to be an invitation to sprawl. They do not feel that the County needs further subdivisions, as this will create more rural sprawl and traffic congestion. They feel the enhanced alternative, number 3, could be developed into a more protective format. She advised that they are working with professional planners and consultants to help create the best possible plan for the County, and they will be submitting more specific and detailed comments.

Paul Chapman advised that the Technical Background Report references the White Rock TPA, and he noted that this is not a TPA. He also noted that the reference to the Williamson Act land acreage needs to be updated to reflect the correct acreage. He stated he feels that the list of unique geological formations in the County should include Striped Rock. He also stated that he feels that the list of historic settlements in the County should include Lewis Creek and others.

Kris Casto referred to the economic opportunities relative to land uses, and asked that consideration be given to including other opportunities such as light manufacturing and research and development. She referred to agri-tourism uses, and she stated there may be other tools than the conditional use permit process which is a laborious process. She suggested that the Board task the definition of what might be appropriate to a tourism group and/or the agricultural advisory committee. She thanked the Board for the discussion and detail on the historic resources section. She stated she feels that it is important to put in place the inventory and guidelines, and that timing is important. She stated she hopes the Board will be taking a proactive stance on design review and uses in our historic downtown
and setting the stage for what we want our town to be like. She reiterated her previous comments relative to addressing handicapped access. She referred to the Pendola Garden area and land uses in the area, and suggested that the area be designated as either the Natural Resource or Agriculture/Working Landscape. She also noted that she feels strongly about complying with the Housing Element, and is willing to work to help with this.

Steve Saunders, a resident of Catheys Valley, stated he came here 4 ½ years ago, and he reviewed the General Plan and the Town Plan for Catheys Valley, and he is at a loss as to why so much change is being proposed. He feels the current zoning is adequate for the future population, but that the roads and infrastructure would be helped by up-scaling the density in the town area. By providing commercial areas in towns, such as Catheys Valley, it will lessen access issues along the major highways in the County as residents won’t need to travel to Mariposa or Merced for shopping. This will help the revenue stream in the County. He feels that by giving a greater density of zoning in the TPA’s, it will attract people that will have a low impact on the community service needs, and they will create jobs for local residents to take care of those things that they don’t have time to do for themselves.

Kori Smith stated she lives and works in Catheys Valley. She feels that 2 ½-acre parcels would provide more housing opportunities for the people that are providing services. Currently those people are forced to live in inadequate housing. She feels that this Plan will set up the economy for the future and can be done to keep the rural nature. She feels the main revenue is from tourism, agriculture, and now real estate. She feels that something needs to be done to keep our economy healthy and thriving. We need to provide housing opportunities for the higher and lower incomes. She noted that businesses suffer when tourism is down for any reason. She also stated that she feels that there is a consensus in Catheys Valley that higher density should be included in the town plan.

Linda Dinnel, resident of Catheys Valley TPA since 1996, stated they have responded in a timely manner to every public notice regarding projects and meetings in the Catheys Valley TPA; however, they never received any response back. The stated she loves the town and the ranch look, and supports the existing TPA.

Steve Fortner stated he is not against the General Plan Update; but he wants the Catheys Valley TPA left alone. He feels there should be more addressing the issues raised in the Jones and Stokes report relative to traffic and population. He stated he feels that the Board should give a pathway for the private sector to move forward with projects. He referred to the infrastructure issues that they have addressed, such as roads, electric, fiber optic switching and water, for the future development of their property in Catheys Valley. He noted that he does not need the County to do anything. He feels the planned cluster development is the best way to preserve the open space versus the five-acre minimum parcel size.

Sandra Martin stated she represents other people in Catheys Valley, and they would like to see the Catheys Valley TPA remain as originally outlined.

Tolley Gorham referred to proposed land use maps for Catheys Valley, and he stated he feels the real proposed map is an octopus with sprawl.

Tricia Oakander stated she would like to see the current TPA kept for Catheys Valley.

Theresa Castaldi, property owner in Catheys Valley, stated she supports the existing Catheys Valley TPA.

Ken Baker encouraged the Board to consider the Catheys Valley TPA as it stands today. He noted that there are people that come in and do not want to take care of five acres. He feels that the community will continue to grow, and he would like to encourage some village-like areas like is done in other counties with cluster/open space development. He noted, that as Steve Fortner pointed out, there is infrastructure in place and these people will support the businesses in Catheys Valley and help the entire County. He does not feel that this will happen if the property is down-zoned to five-acre minimums.

The public portion of the hearing was closed and discussion by the Board was held. Staff and Bob Duchek responded to questions from the Board relative to the zoning along Highway 49 North between Mt. Bullion and Bear Valley (Pendola Garden area); whether the EIR addresses the issues with Catheys Valley and the proposed town plan with regard to the issues that were raised; clarification of the density issue for the Catheys Valley area; and clarification of the land use planning maps that were referred to by the public for Catheys Valley.
Additional input from the public was provided by the following:

Ken Baker stated he feels that the people do not understand what maps are being discussed for Catheys Valley. They are trying to understand how the change of going from the existing one and two and one-half-acre density to the five-acre density can help. He feels that this is detrimental and they do not have an explanation as to why this is happening. He asked whether there is a community plan. Sarah Williams provided clarification of the existing zoning for all of the TPA’s without a Specific Plan and the minimum parcel size. She noted that this General Plan changes the minimum parcel size throughout the County to five-acre density for all community planning areas without a community water/sewer system. Ken Baker urged the Board to give this serious thought. He feels that this proposal is down-zoning.

The Board continued with discussion. Supervisor Turpin provided comments and suggested changes/corrections relative to the “ready to build” issue; clarification of hilltop and ridgeline design and using an “average” slope of 15%; using “minimize” versus “reduce” cuts and fill for building sites on page 5-33; deletion of the statement about Coulterville not having the capacity of water on page 9-6 if this is verified by Public Works; whether the requirements for water rights on ponds was reduced from 50-acre feet to 15-acre feet; and he referred to A-10 and the memorandum from Mendocino County and he requested a better definition. Kris Schenk requested that the comments be presented in writing. Chairman Pickard noted that the final DEIR will come back with another hearing process after the first of the year. Supervisor Bibby asked that the website clearly show the deadline for accepting comments.

She advised that the Farm Bureau will meet this evening and put together a response for the General Plan Update. She asked that the Board continue with the General Plan Update as it is currently proposed.

Len McKenzie, representing MERG, referenced the statements in the General Plan relative to urban sprawl, and stated he feels that we need to avoid sprawl and protect the open space. He also recognized the presence of people that have assisted them in forming their comments on the draft document.

J. J. Gillespie stated she does not feel that there is anything in the General Plan Update that will stop sprawl, and she is concerned about development. She advised that she submitted a letter to Planning. She also stated that she feels that we need to maintain our agricultural character.

Stan Rudd, Bear Valley area, referred to the proposed Pendola Garden development, and he stated he is concerned with the lack of water for the development.

Annie Durazo, Service Employees International Union (SEIU) United Healthcare Workers West, representing the in-home health care workers in the County, stated it is her understanding that the County will implement a wage increase that is inferior to the other counties that they represent. She advised that they are asking, and would settle for less that the $10.50 an hour that is available at the State level. She also advised that they would settle if the County put in another seventeen cents, and she asked the Board to reconsider its position. She stated she does not feel that the workers can survive on $6.75 an hour. She also noted that November 14 – 18th is Home Care Workers Week. Chairman Pickard stated the Board has a great deal of respect for the workers, and he advised that the Board has put a fifteen percent increase on the table, with the ability for the workers to obtain health benefits, and that is more than the other County employees have received. He also suggested that they contact Human Services to submit something for recognition of the Home Care Workers Week in the future.
Viola Reeder, IHSS recipient, stated she feels that the home care workers need a contract and a raise. She read the “Loving Care Giver.”

Janet Schmidt was present with her daughter, Katie, and she noted that she provides home care services for her daughter. She commented on the difference between the wages and benefits here and those that she received in Alameda County.

Holly Warner, Upper Merced River Watershed Coordinator, presented their letter of comments on the draft General Plan Update.

Kris Casto commented on the draft General Plan Update, and she expressed concerned with the proposed development along Pendola Garden Road. She stated she feels that we should preserve the rural, open space, and agricultural uses; and she urged consideration of the rural resource land use classification. She stated she feels that consideration should be given to the impact on the safety response to the area.

Dick Kunstman, Conservation Chairman for the Yosemite Audubon Chapter of the National Audubon Society, stated he is still working on comments to the draft EIR, and he hopes to be able to submit them before the deadline at the end of today. He stated his main concerns are water supply and global warming. He feels that tracers should be used for the water to determine the connection between the existing supply and the proposed use. He noted that there is a severe decline in the Sierra snow pack due to global warming.

Paul Chapman referred to Consent Agenda item 4, and he stated he feels that the Board needs to get the boundaries of the water district changed before taking action to approve the plans and specifications for the regional recreation complex waterline project.

Jim Spotts, resident of Highway 49 North, expressed concern with the impact that growth will have on the Pendola Garden area. He stated he chose this area because he understood that the County was concerned about managing growth.
