Staff responded to a question from the Board relative to the lots that access the dirt section. He feels that there should be more time to provide input on this project; and he expressed concern with the noise and dust impacts. He provided additional input on the road circulation and signage issues and responded to the issues that were raised. He responded to questions from the Board relative to the status of the roads and maintenance and brushing and future maintenance.

Ruth Catalan asked whether two homes could be constructed on each parcel. Staff responded that secondary homes can be constructed per State law.

Mike Springer noted that the people who own the plant nursery have their property split by Leonard Road and they were told they would need to pave the road to subdivide.

Eleanor Keuning noted that Jerry Kemp, owner of the mobile home park, is present and questioned whether he has any comments. She referred to her previous experience with the City Council and Planning Commission in Tracy and her attempt become familiar with the site for each project proposal.

The public portion of the hearing was closed and the Board commenced with deliberations. Staff responded to questions from the Board relative to the existing water development policy and relative to the possibility of requiring the brushing to be maintained for three to five years. Dick Seaman responded to the question from the Board relative to the brush maintenance issue.

Supervisor Cann noted that the issues relative to the status of Leonard Road relate to the portion of the road that is beyond the project site; and he referred to the correspondence that commented on the removal of a bridge from Wawona and advised that it was moved to Lake Mead. Supervisor Allen referred to previous dialogs in the 1980’s relative to road improvements and noted that is being worked on. Supervisor Aborn stated he would like time to drive the area. Larry Enrico clarified that the County accepted Harvest Drive for access, but not for maintenance.

Discussion and Possible Direction Regarding Designating J-132 (County Road) within Mariposa County (Coulterville to Tuolumne County Line) as John Muir Highway

BOARD ACTION: Supervisor Turpin initiated discussion relative to the proposal and advised that addresses on Greeley Hill Road will not change and the John Muir Highway name is a route designation only.

Ken Pulvino gave a presentation on the request and reviewed the history of his work on this matter. He advised of the next steps in the process: obtain Board approval for the name designation; nomination to the Yosemite Geotourism site; update the online maps; obtain support of Tuolumne County; legislative process and funding; sponsorship from the legislators on an initiative; and development of a website.

Members of the audience provided input and asked questions about the proposal. The audience noted the need to update all maps, including the one by the rest area in Mariposa to reflect J-132; asked how this would affect taxes; asked whether there would be road improvements; and suggested that the internet include information on the sites in the area that could be downloaded for the tourists to use when traveling. Rick Benson advised of the Fire Chief’s efforts to make corrections to the three major route companies for the internet.

MaryAnn Huff, resident and business owner and President of the Chamber of Commerce, thanked Ken Pulvino for his work on this project and commented on the importance of economic development and “branding”/getting the name designation. Dana Hertfelder, Public Works Director;
Discussion and Direction Regarding Establishing an Ad-Hoc Advisory Committee to Develop a Business Plan for the Mariposa-Yosemite Airport

BOARD ACTION: Discussion was held with Dana Hertfelder relative to the request to establish a committee. Supervisor Bibby asked that consideration be given to including a member from the Mt. Bullion community and with involving the community; suggested the committee meet at the Airport terminal; and she asked how miscellaneous expenses for the committee would be handled. Supervisor Turpin suggested that the County Administrative Officer be the lead with the committee versus the Public Works Director since the work involves developing a business plan. Rick Benson
suggested that the committee structure be such that they can do their work and present a plan to the Airport Advisory Committee; i.e., the Board should not appoint the members and set-up the committee. It would be a Public Works committee set up to develop a business plan and make its presentation to the Public Works Director; and the Public Works Director can present the plan to the Airport Advisory Committee. Supervisor Bibby noted that she has a remainder interest in property in the area.

Input from the public was provided by the following:

William Brandle advised that they plan to gather all ideas and review them to establish short-term goals and then work on long-term goals at a later time.

Ruth Catalan asked if the County provides funds to this committee, whether it would become subject the Brown Act. She stated she agrees with having the committee.

Dick Hutchinson stated he likes Mr. Brandle’s idea of planning for now and for the future; and he feels that this is the beginning of a strategic plan for the County.

Rick Benson advised that the Brown Act will be reviewed, including consideration of whether Board members should be a part of the committee, to make sure that the establishment of the committee is done properly. Discussion was held. Motion was made by Turpin to direct the Public Works Director and the County Administrative Officer to establish an ad hoc committee as discussed. Rick Benson suggested that direction be given versus formal action, and the Board concurred.

William Brandle thanked the Board and stated they are ready to begin meeting.

Eleanor Keuning questioned whether Supervisor Turpin should withdraw his motion or if it dies for lack of a second.

Supervisor Turpin withdrew his motion. Supervisor Bibby noted that any group of citizens can meet and present ideas.

- Eleanor Keuning stated she agrees with the concern about treating employees fairly; and she referred to the request to create a new position in the proposed reorganization of the Department and asked for clarification as that position will cost more.

**BOARD ACTION:** Discussion was held with Fred Lustenberger relative to amending the County Code.

Input from the public was provided by the following:

Dick Hutchinson reviewed his memo relative to amendment and suggested corrections. He questioned the fee increase information that is contained on the website for the Building Department.
Su Carney asked for clarification about the integration of the residential and commercial codes in the County; and Fred Lustenberger provided clarification.

Todd Layton asked whether a residential permit could be used for a commercial building; and Fred Lustenberger responded in the negative.

Bill Verley, representing the Mariposa Contractors Association, advised that they have questions and asked for a thirty day continuance to further review the amendments.

Floyd Davis advised that agencies can adopt their own codes; otherwise they have to adopt the Uniform Building Code; and he asked for time to review the amendments and to comment.

Discussion was held. Supervisor Bibby suggested that “final” be removed from Section 15.10.030 Utility Service Requirement. Supervisor Cann noted that additional changes could be made in the future. BOARD ACTION: Chair Aborn reviewed the hearing procedures. Sarah Williams, Deputy Planning Director, presented the staff report, including a review of the history of the project and issues and previous actions that have been taken relative to the agritourism issues. She reviewed and advised of the five appeal issues that were submitted: 1) Permit authorized as necessary to continue permitted use existing prior to Ordinance No. 1049; 2) Permit application was deemed complete prior to Ordinance No. 1049; 3) refusal to continue processing Permit Application was arbitrary, capricious and contrary to California law; 4) decision was discriminatory, in bad faith and violates appellant’s civil rights in violation of Title 42, U.S.C. Section 1893; and 5) appeal is without prejudice to appellant’s right to seek relief at any time. Kris Schenk and Sarah Williams responded to questions from the Board relative to clarification of whether the issue on appeal is the size of the restroom facilities or whether they are permitted. Debra Willis responded to a question from the Board relative to the status of the cabins.

The public portion of the hearing was opened and input was provided by the following:

Appellants Presentation:
Attorney Gerald Weaver advised that he is representing Castaldi and Oakander, owners of the Coyote Springs Ranch. He advised that the request is for a ministerial building permit and that there is an obligation for the permits to be issued as long as they meet the Building Code. He feels that based on their history with Planning staff, that staff is trying to keep this use from happening until the policy is adopted for agritourism uses. He referenced the arena events and uses that have been held on the Ranch. He provided input on the status of the building permit application for the free-standing restrooms in relation to the urgency Ordinance that was adopted earlier this year, and
stated he does not understand why there is a concern about the proposed size of the facility. He feels that the permit was accepted by the County and other applications were submitted for the Ranch; and it was subsequently agreed to put this application on hold, and then the County accepted reactivation of the application. He does not understand the relevance of Resolution No. 09-42 to the restroom project. He presented the following documents for evidence:

1) Letter from Theresa Castaldi dated October 30, 2008 to the Building Department putting the Public Restroom Project on hold;
2) Letter from the Planning Director dated August 6, 2008 to the applicant relative to the review of Plans for Permit No. 27681, along with a schedule of events for 2008 at the Ranch;
3) Letter from the Deputy Planning Director dated February 3, 2009 to the applicant concerning the adoption of Resolution No. 09-42, along with a copy of said Resolution;
4) Letter from the Building Director dated October 31, 2008 to the Health Director and the Planning Director relative to the processing of the permits; along with a letter from Planning dated July 25, 2007 to the applicant relative to serving food and beverages; and
5) Staff report for the Board meeting of January 13, 2009 relative to Appeal No. 2008-193.

Ken Baker, Project Manager for Coyote Springs Ranch, testified as to the agritourism uses that have occurred on the property since 2007, and showed a file full of flyers and brochures that he has for the events; i.e., Western Fair, rodeos, arena events, and ranch tours, etc. He advised of their presence on the Web and that they are a cow/calf operation and are experimenting with growing other products on the Ranch. He advised that they applied in 2009 for permits to have bus tours and to feed the guests by catering. They are applying for a Gathering Permit for their third annual Catheys Valley Fair. He appealed to the Board to look at what we have in the County and the possibility and to do something to make it work for everybody versus putting obstructions in the way.

Speakers in Support of the Appellant:
Steve Fortner, property owner in Catheys Valley, stated he has been fighting with the County for fifteen years over what they can do with their property. County Counsel admonished that the testimony needs to be limited to the five issues raised on appeal. Steve Fortner continued and advised that there is a nexus as they have a mortgage against Coyote Springs Ranch and this is the first issue that has gone through the administrative process and if there is any litigation, they will need to be faced also. County Counsel reiterated that the testimony needs to be related to the issues raised in the appeal. Steve Fortner referred to his installation of the water tank which was “against the rules” and stated he feels this is the same. He stated he feels that things need to be brought up in the administrative process so they can be used in an appeal to the Court. He feels the bathrooms are a nexus to trying to limit the size and success of this organization.

Opponents Presentation:
County Counsel reiterated his statement that the testimony needs to be related to the issues raised in the appeal.
Rita Kidd stated she is a member of MERG (Mariposans for the Environment and Responsible Government) and she presented a letter from MERG dated November 2, 2009 asking the Board to apply existing law and uphold the decisions made by County staff. She presented a letter from herself and her husband, Tony, dated November 3, 2009 relative to the appeal and urging the Board to defend and support the Planning Director and Building Director’s determinations. She advised that she serves on the Agritourism Advisory Committee; and she used an analogy of Savoury’s Restaurant moving and building a restroom first. Then they see that they can add more tables and chairs and serve more people and exceed the Fire Marshall regulations. She noted that the Agricultural Exclusive zone is different than the other zones. She also noted that this operator has a permit to build a use that is in excess of what is recommended in the agritourism policy that is coming to the Board. She provided input on the agritourism uses being located in areas with other uses.
Rick Benson, County Administrative Officer, asked the Board about continuing the hearing for the Chair to participate as he has another appointment. Chair Aborn asked the appellants if they are agreeable with continuing the hearing. Attorney Weaver concurred and advised that his staff report will be the same for the Building appeal. County Counsel provided an admonishment and advised that since the Board is in the middle of the hearing process, this matter should not be discussed by the Board members outside of the hearing process. (M)Turpin, (S)Allen, the hearing was continued to 2:45 p.m./Ayes: Unanimous.

12:21 noon Lunch

2:46 p.m. The Board reconvened and continued with the public hearing to consider Appeal No. 2009-138. Chair Aborn called for any further opponents presentation, and none was received.

**Rebuttal by the Appellant:**

Attorney Weaver referred to the opponent’s presentation that the use of the property now is in excess of what the new policy would allow. He advised that this is assuming that a new ordinance is adopted that limits the occupancy to less than 250 persons a day; and even if that happened, his clients would have an existing non-conforming use.

The public portion of the hearing was closed and the Board commenced with deliberations. Staff responded to questions from the Board relative to the application process for this permit; relative to Public Assemblage Permits and how many times they could be issued at a location where the zoning is improper; relative to the current permit for up to 250 day guests and how this request for the restroom facility fits in; current allowed uses and what would be permitted as non-conforming (grandfathered) use once an agritourism ordinance is established; and being able to accommodate needs of the guests that are allowed with a Public Assemblage Permit, and clarifying that issuance of a Public Assemblage Permit is not guaranteed and it is for a temporary use. Fred Lustenberger responded to questions from the Board relative to the status of the cabins since the last hearing. Planning staff responded to questions from the Board clarifying that this appeal stands on its own and does not address the cabins; and relative to determining “deemed to be complete” for permits. County Counsel reviewed the options available to the Board for action: 1) deny the appeal; 2) uphold the appeal; or 3) request further action from staff.

(M)Allen, (S)Bibby, Res. 09-535 was adopted denying Appeal No. 2009-138, with the recommended findings. Further discussion was held. Ayes: Aborn, Bibby, Cann, Allen; Noes: Turpin. The hearing was closed.

3:31 p.m. Recess

3:36 p.m. Fred Lustenberger, Building Director;
**PUBLIC HEARING to Consider Appeal No. 09-01, an Appeal of the Building Director’s Determination Resulting from Review of Building Permit No. 27628. Building Permit Applicant and Appellant: Theresa Castaldi c/o Gerald C. Weaver. Coyote Springs Ranch is located at 2100 Old Highway, Catheys Valley and Includes Ten Parcels. The Subject Appeal and Permit Involves APN 016-220-008, a 21.47 Acre Parcel.**

**BOARD ACTION:** Fred Lustenberger presented the staff report and advised that they established the maximum occupancy for the six allowed cabins at 24 persons. He reviewed the two appeal issues: 1) relative to the decision being arbitrary and capricious; and 2) relative to the restrooms having no relation to the maximum occupancy of the dining room. He reviewed their consideration of the codes and issues with sizing the kitchen/eating/restroom facility and advised that they based the decisions on the cabin occupancy. He responded to a question from the Board relative to the application for the eating facility.

The public portion of the hearing was opened and input was provided by the following:

**Appellants Presentation:**

Attorney Gerald Weaver advised that there is no ordinance which defines agritourism and he referred to the definition contained in the General Plan and the permitted uses. He stated he feels that the Planning Department wants to limit their uses. He referred to the State law and the
County Code relative to determining when an application is deemed complete for processing. He referred to the plan on circle page 18 in the agenda package and the note by Planning relative to the approval of the bathroom structure; and he stated he does not feel that this is a discretionary permit. He questioned why approval was given to have food for guests, but the eating facility is being separated out for just overnight guests. He advised that his client did not realize that there could be an appeal on this and let the time run, and they are asking that the error not be compounded. He presented for evidence minutes (Minute Order) from the Board meeting of February 2, 2009 relative to adoption of urgency Ordinance No. 1049 and exemptions for the Ranch. He stated he feels that the Building Code Table being used by Building is only for the purpose of determining ingress and egress and not size. He questioned why the eating facility and restroom sizes are being limited, when there would be no such limit for a home. He referred to horses and agritourism issues. He addressed their appeal issue relative to discrimination against the applicant and stated they are reserving their right to file actions in Court as he feels that a meeting was held by departments to try and put Coyote Springs Ranch out of business.

Ken Baker and Fred Lustenberger responded to questions from the Board relative to the square footage of the proposed restroom and the recommended size. Attorney Weaver responded to questions from the Board relative to the number of visitors they intend to serve in five to ten years; relative to plans and goals for the Ranch; and relative to established procedures for moving forward by using the Conditional Use Permit or zoning change process. Attorney Weaver advised that the only reason they filed this appeal is to get a change of attitude with this project. Ken Baker further responded to questions from the Board and advised of the existing usable space and facilities; and he advised that they have not done anything different than what was planned in 2005 and they have a tremendous investment in this project. He feels they need the requested bathrooms for the existing space and to serve future space. He stated they have been trying to move forward with things that they were told the County wanted. They want to move forward with a Conditional Use Permit or zone change, but face the possibility of having everything being closed down. He noted that they can bring in porta-potties, but does not understand why they can not have the restrooms. Ken Baker responded to questions from the Board relative to their planned uses for the barn and the permit status; and he advised that he left a copy of the engineering information that was requested by Building for each of the Board members – that is separate from this appeal. He also feels that the three bathrooms are needed for the cabin guests so they do not have to stand in line as they have a limited time to eat. Attorney Weaver responded to a question from the Board relative to the statement in the appeal that the restrooms have no relation to the maximum occupancy of the dining room.

Opponents Presentation:
Rita Kidd referred to the letters she submitted earlier for the Planning Appeal, and she advised that the letters addressed both appeals. She noted that we are talking about a 1,000-acre ranch that consists of ten parcels and they could be owned by different people. She also noted that the subject parcel is in view of two existing homes. She advised that the six cabins were authorized by the Board exercising their discretion over the Planning Director’s decision; and she provided input on the Farm Stay law requirements for a kitchen and meals and she feels the issues of the dining room and restroom needs to be considered in this context. She supports asking for a business plan and noted that the Planning Director has requested this on more than one occasion. She urged the Board to support the Building and Planning Departments.

Rebuttal by the Appellant:
Ken Baker advised that they have agreed to give the County a master plan on anything they want to do in the future and to re-zone or apply for a Conditional Use Permit; however, they have been told that would have a devastating affect. They are working on a business plan and will submit that. He noted that they requested nineteen cabins and were approved for six and that they did not apply for the Farm Stay use. He referred to the agritourism policy established by Calaveras County. He stated he feels that the correspondence that has been sent to them is based on opinion and not legal issues.

County Counsel advised that this is an opportunity only for rebuttal of the issues that were raised; and he advised the Board that its deliberation should be based only on the issues of the appeal.
Fred Lustenberger clarified that his use of the Plumbing Code for the number of fixtures does not have anything to do with egress and ingress. He further advised that earlier in the process, he talked with representatives of the Ranch relative to their hopes to be able to expand, and discussion was held relative to allowing them to rough in the plumbing and install the fixtures later as needed. Supervisor Turpin suggested that a recess be called for the Building Director and the applicant to discuss resolving the appeal to see if an agreement can be reached. County Counsel provided input and advised that the Board is not permitted to engage in discussions of trying to resolve the appeal outside of this hearing process; and he responded to questions from the Board relative to the applicant being able to withdraw the appeal if an agreement is reached. He further advised that the Board would not be able to approve any project that exceeds the scope of the Director’s determination at this time.

Attorney Weaver provided input relative to trying to reach an agreement to keep the size of the building that is being proposed, but with fewer fixtures; and he advised that if agreement is reached there would be no reason to go to Court.

The public portion of the hearing was closed. The Board commenced with deliberations. Discussion was held relative to the size of the facility and allowing for future expansion; and previous direction that was given to the Building Director relative to allowing the six cabins. (M)Cann, (S)Turpin, Res. 09-536 was adopted approving the appeal and overturning the Building Director’s determination and findings and allowing the restroom facility to be built/Ayes: Turpin, Cann, Allen; Noes: Aborn, Bibby. The hearing was closed.

5:05 p.m. Recess

5:15 p.m. Kris Schenk, Planning Director;
Project Site for Certificate of Compliance Application No. 2007-093 was APN 016-080-002 (Now a Retired APN); 871 Highway 140, Le Grand (Merced/Mariposa County Line). (Continued from October 13, 2009)

BOARD ACTION: Kris Schenk introduced the appeal. Sarah Williams/Deputy Planning Director, presented the staff report, including review of the application and processing status; advised of changes due an appellate case, The People v. Tehama County Board of Supervisors, et al., (2007) (the Tehama case) and affect this case has on processing the “fractionalized” patents; reviewed the appeal issues; advised of correspondence received from the appellant; presented a revised formal resolution that reflects the continuance of this hearing from the original October 13th date; and advised that the applicant is still working to find additional grant deed information. Staff responded to questions from the Board relative to the property line for the original homestead of the property and how the line became different; and relative to the minimum parcel size for a subdivision today.

The public portion of the hearing was opened and input was provided by the following:

Appellants Presentation:
Jeff Miller advised that he is one of the applicants. He advised that Parcel 32 (the pink and green piece on the map) were created by a deed and he has not provided that deed to staff. He advised that all of the property was originally owned by Harry Chase, then there was a foreclosure and parcels were sold and traded and repurchased. In 1971, a line was drawn and the property was divided. They knew there were patents and that they were separating them and the attorneys for both sides said that everything was legal and the divided parcels would be recognized as separate parcels as was their intent. He advised that he has a different opinion of the Tehama case and he does not feel that it prevents recognition of the “fractionalized” patents as their intent was to keep the parcels separate. He advised that when they received their first tax bill in 1971 after dividing the property, it was for the full 4,333 acres and when they asked about receiving tax bills for each parcel, they were told that the tax bill had no bearing on the separate legal parcels. So they didn’t file separate deeds to receive individual tax bills. He referred to a line in the Tehama case that says if you give away a portion, it becomes a separate parcel. He responded to a question from the
Board relative to being able to locate additional information to help with the determination for some of the parcels in question.

Sarah Williams provided input relative to the assignment of Assessor Parcel Numbers (APN) for tax bills; advised that the “vicinity map” on circle page 19 in the packet shows the current APNs and the map on circle page 24 shows the boundary of the patents and how they relate to the current property line for Miller/Clifton. She responded to questions from the Board as to what the decision would have been if this matter was considered prior to the Tehama case and advised that the Certificates of Compliance would have been issued for the “fractionalized” patents; and advised that there was no minimum parcel size.

**Opponents Presentation:**

Rita Kidd stated she was speaking as a Board member for MERG and reviewed the key points in the letter she presented. She advised that they are not opposed to the request; however, wanted to present information relative to “fractionalized” parcels. She referred to their previous research with the Hewlett’s request to receive Certificates of Compliance, and she advised that Santa Barbara County charges $1,000 per requested Certificate of Compliance and they have a very clear policy that you have to be able to track back to the original boundary of the patent through the changes of title.

**General Comments:**

Anita Starchman Bryant stated she was speaking as a member of the public and responded to the input provided by Rita Kidd. She clarified that the burden of research is on the applicant in Mariposa County and not the County. She responded to a question from the Board and advised that she does not know what research Santa Barbara County does.

Staff responded to questions from the Board as to whether right-of-way and access to each of the parcels is an issue.

**Rebuttal by the Appellant:**

Mr. Miller responded to questions from the Board relative to the status of their research and he advised that additional research will not help them with the parcels that are split by the property boundary as they relied on their attorney’s advice that the split created separate parcels; advised that he is not aware and has not been able to locate any letters or documents to support the advice given by their attorney – H. Spencer St. Clair, and he advised that Attorney Braucht represented the other portion of the property. He advised that he was at the meeting with his mother and father and Attorney St. Clair and personally heard the discussion and statement that the parcels that were split would become separate parcels; and he had a direct conversation with Philip Chase that he had received the same information from his attorney. He referred to the Tehama case and advised that the creation of separate parcels is what the parties intended.

The public portion of the hearing was closed and the Board commenced with deliberations. County Counsel responded to a question from the Board relative to the definition of “extrinsic” as used in the Tehama case and advised that it means events that occurred outside the confines of the deeds or instrument that transferred property. Staff responded to questions from the Board relative to being able to further consider any new evidence that might surface following this hearing; whether this is the first application that has been processed since the Tehama case; and relative to the change in the revised resolution that was presented to reflect the continuation of this hearing. County Counsel reviewed the actions available to the Board: 1) uphold the appeal; 2) deny the appeal; or 3) provide direction for staff to come back. Staff responded to a question from the Board relative to being able to sell a parcel if it has a Certificate of Compliance. Rick Benson, County Administrative Officer, reiterated the options for action as stated by County Counsel.

(M)Allen, (S)Turpin, Res. 09-537 was adopted upholding the appeal and overturning the Planning Director’s determination and findings based on the evidence that was presented; and finding that the Tehama case allows for oral testimony to be considered. Further discussion was held relative to the decision and future consideration of requests. County Counsel advised that the Board’s job is to weigh the evidence on a case-by-case basis and to determine whether there is sufficient credible evidence, including looking outside the confines of the deed, to preserve the historic parcels that were granted originally. Ayes: Turpin, Cann, Allen; Noes: Aborn, Bibby.
Kris Schenk asked for clarification relative to the findings for this action and discussion was held. Rick Benson advised that the findings could be based on the testimonial evidence that was presented by the appellant relative to the intent of the parties when the parcels were separated. County Counsel provided additional input and advised that the Board could find that the intent was to protect the separate parcels; and that extrinsic evidence was offered by Mr. Miller relative to his personal meeting with his mother’s attorney together with his father concerning the discussion of the separate parcels. Supervisor Cann asked about having a definition of “extrinsic” for Planning. County Counsel responded that it is a term of art meaning it has a specific legal definition and he will provide that information to staff. He further recommended that the Board direct staff to bring back the recommended findings that would support upholding the appeal, and Chair Aborn so directed. The hearing was closed.

Rita Kidd suggested that a workshop be held on historic parcels “patents.” She advised that she feels that this action just doubled the number of sub-standard parcels because the parcels on the other side of the property line equal the number in question in this appeal. She feels that this action took away staff’s ability to negotiate the merger of substandard parcels and leaves open for those parcels that were merged to come back and that creates another dilemma.

6:49 p.m. Adopt a Resolution Rescheduling the Regular Meeting of the Board of Supervisors for November 10, 2009 to Commence at 10:00 a.m. (County Administrative Officer/Personnel/Risk Manager)

Supervisor Bibby;
Discussion and Possible Direction to Staff Relative to the Possible Bridgeport Area Fire Station

BOARD ACTION: Supervisor Bibby initiated discussion and advised of the meeting that was held with the property owners relative to the proposed site and the issues that were raised. Jim Wilson, Fire Chief, stated he agreed with the summary of the meeting provided by Supervisor Bibby. Supervisor Cann advised that he attended the meeting and he noted that it would take a majority of the property owners to agree to a change in the CC&Rs (Covenants, Conditions and Restrictions) for the property to be used for a fire station; however, he feels that in order to move forward the community should be supportive. Rick Benson provided input relative to being able to encumber future Boards. Discussion was held.
Input from the public was provided by the following:

Mark Long stated he is not a property owner in the subdivision and he does not know why this is being discussed as he feels that the County owns a piece of property that it was given for a fire station; and he presented a map and draft site plan.

Jim Fritze stated he owns property near the proposed site, and he noted his neighbors have expressed concern to him with locating the fire station in the Bridgeport Subdivision. He advised that he would see the proposed station out of his bedroom window. He purchased land in this subdivision because of the CC&Rs and the protections they provide; he commented on the vote of property owners in support and opposed to this; and he stated he is concerned with the large metal building, equipment, siren noise, and impact to surrounding property values. He advised that he is not against a fire station, but feels alternative sites should be reviewed, including the parcel the County already owns and the parcel that Sidney Radanovich discussed earlier.

Carl Gala stated he is a neighboring property owner to the subdivision and he feels that an alternative location should be used that will not impact the area. He disagrees with putting the station in a residential area and is concerned with aesthetics and impacts from operations at the station.

Ed Hart stated he owns the subject property and advised of the informal vote they took: 14 support and 9 oppose. He commented that the property could be used for animal rescues during fire emergencies.

Jim Pruitt stated he is a retired Fire Captain from Los Angeles and he understands the concerns. He advised of a similar experience he encountered with replacing an older fire station with a new structure in a residential area. He feels that this station is needed and noted that response times are important for fires and medical calls.

Dawn Afman stated she supports this station and she understands there are concerns. She commented on her recent tour of the Angora Fire and she noted that structures burned even though the vegetation was cleared. She noted that the station is needed for medical calls as well as for fires. She does not understand why we are not more positive; and she advised that she brought a person with her who lives next to a fire station.

Pat Garcia stated she lives in Ponderosa Basin and they do not have a noise problem with their fire station. They have a lot of grateful residents and there is a house next door to the station. Sidney Radanovich commented on the new architectural designs for barns and suggested that this be considered.

Discussion was held. Supervisor Bibby asked the Fire Chief to provide input on the status of the property that was donated to the County by the Longs; and she noted there were concerns with map act issues, location of the rentals and terms and conditions, and issues with the size of the parcel. He also referred to consideration of the property owned by the School District. Jim Wilson provided input on the parcels and issues, citing criteria and boundaries for the station area. Supervisor Bibby commented on using Tobacco Settlement Funds for this station. Supervisor Allen stated he would like to see a final determination by staff relative to the parcel donated by the Long family, and he feels it should be returned if it is deemed not suitable for the County’s use. He stated he would like to look at the property that Sidney Radanovich discussed earlier; and he wants to see a solution reached. Supervisor Turpin agreed with getting a determination on the Long parcel. Rick Benson asked for formal action by the Board relative to continuing to pursue purchase of the property in the Bridgeport Subdivision; and he advised that the previous action would still stand to pursue all other options. (M)Cann, (S)Allen, Res. 09-583 was adopted directing the County Administrative Officer to disengage the County from the process for the parcel in the Bridgeport Subdivision/Ayes: Unanimous. Supervisor Bibby asked staff to address the Long parcel as discussed; and Rick Benson advised that a report will be brought back to the Board for formal action to be taken.

Staff responded to questions from the Board relative to the applicant understanding that the contract runs with the property for the full term; relative to future changes in the use with the training and sale of horses and being able to comply with the Williamson Act Contract terms with the cattle; clarification of there not being any patents and whether that applies to mining claims – staff will review this issue before finalizing the contract; clarification that this property is owned by one owner and there will only be one contract; relative to consideration of the financial implication to the County of approximately a $7,600 reduction in taxes for this contract; relative to the status of enforcement of the contracts; whether the Board can deny an application if it meets all of the criteria and clarifying that this application was reviewed by the Agricultural Advisory Committee and the Planning Commission. The public portion of the hearing was closed and the Board commenced with deliberations relative to the application and the issues that were raised, including the need for enforcement. Staff responded to a question from the Board relative to the change in the contracts to address underlying historic parcels. Input from the public was provided by the following:

Rita Kidd stated she feels that there should be analysis and more information developed, such as the number of people that will be laid to rest, to determine the size of parcel, before looking at the sites. She noted that there is a requirement in the General Plan for a Capital Improvement Program; and she suggested that an advisory committee be established to work on this with a timeframe like was used for the agritourism policy.

Gary Walker asked which committee worked on this matter.

Dana Hertfelder responded relative to the status of the cemetery committees and the responsibility of Public Works. He advised that there are around 15-20 casket internments a year. He advised that following the Board’s action, the document will be submitted to HCD and that triggers a ninety-day process for their review and possible changes. Any changes and questions that come up would be reviewed by the Planning Commission and then the Board; and then it would be certified. Mark Niskanen, J. B. Anderson Land Use Planning, reviewed the following: housing element standards – what the housing element is comprised of; legal requirements – must be updated every five years, be consistent with the other elements of the general plan and be certified by HCD; Regional Housing Needs Allocation (RHNA) – reviewed allocation of the 1,084 units over the next seven years; public participation and agency comments, including a public workshop, housing questionnaire, review period, and Planning Commission hearing; summary of key factors – review of the areas that were updated; Planning Commission’s recommendation; and the next step in the process.

The public portion of the hearing was opened and input was provided by the following:

Don Starchman, Starchman & Bryant Attorneys at Law, advised that they are not asking for zoning; however, the responses that they have been getting to their questions are that zoning and Catheys Valley are not being discussed. He feels the issues they have addressed could be dealt with in the goals, policies and program section. He expressed concern with not having a specific inventory of property in Appendix “D” and with the constraints of the individual parcels not being addressed. He referred to the need for affordable housing and being able to meet the need. He referred to the Mariposa Specific Plan and the requirements for steep parcels and he stated he feels that the road standards are not reasonable, environmentally or economically, for the steep parcels. He advised that the parcels on the map that are north of the Hospital are not in the MPUD (Mariposa Public Utility District) service area and that the “field of dreams” and church properties are shown as residential. He does not feel that their written or oral testimony has been addressed. He feels that the Catheys Valley town planning area need to be addressed; and he feels that the State needs to be aware of down zoning of property. He questioned whether this addresses public programs for job creation/generation. He reviewed the headings in his December 4th letter that was submitted to the Board; and he asked where the parcels are going to come from to meet the housing needs as zoning is not enough. He advised that the studies on the Fortner project in Catheys Valley are current. He stated he would like to see clustering considered to be able to meet the economics and road standards for a project. He stated he feels that citizen participation has been lacking. He feels that the document does not address economic diversification as referred to in Program 7.1 and hillside development standard restrictions. He stated the timeframes stated in the Element for obtaining a building permit or a tentative map do not reflect the actual timeframes. He referred to Policy 3.3 relative to the County assisting special districts to expand; and he noted that the draft Catheys Valley Plan calls for no special districts, so he feels that is a conflict. He feels there is an exclusionary philosophy for the western/Catheys Valley area of the County.

Mike McCreary referred to his history of working with local government, and he thanked the Board members for their dedication to public service. He referred to the staff report and noted that it contains a great deal of effort and public expense. He does not feel that this is a job program or an effort to re-write the General Plan. He referred to the complexity of the issues and the fact that this is an unfunded mandate. He asked what the impact will be to the grant funding and the implications if the Board decides to not move forward with the staff recommendation. He referred to the length of this process and the opportunity to provide input. He stated he does not feel that we can let the “perfect be the enemy of the good” and he does not feel that we have the dollars to analyze every sentence. He feels it is important to move forward with this to receive funding. He
commented on the importance of tourism to the County, and he thanked the Board for working to do its best for the overall community. He feels the Board should act on the staff and consultant’s recommendation and move forward.

Vice-Chair Bibby advised that a recess would be taken and cautioned the Board members that it is still in the public hearing process and they cannot discuss this matter during the recess.

10:54 a.m. Recess

11:05 a.m. Beth Tomsick, representing Habitat for Humanity, stated she agrees with Attorney Starchman relative to representing the entire County in the Housing Element; and she agrees with having the proper density and low income housing. She advised that they were given a five-acre lot with water and septic, but it only allows for one family. They would like to see parcels available in the town areas for the low income because that is where the services are. She asked if they are one of the public agencies mentioned in the Element. She advised that they appreciate the help they have received.

Rita Kidd, on behalf of MERG (Mariposans for the Environment and Responsible Government), read their letter into the record which focused on the following four points: the issue of the Catheys Valley Community Plan has not been noticed for discussion at this meeting, the Housing Element is not a document that takes precedence over policies in other elements of the General Plan, the Housing Element must contain certain analytical details, and there are specified procedures in Government Code that define how policy changes are made to the County’s General Plan. She advised that speaking on a personal level and with the utmost respect and like for Starchman & Bryant Law firm, she feels that some of their presentation today is 180-degrees from the General Plan hearing. She noted that it has been three years since the General Plan was adopted and she commented on the status of implementation. She referred to the water study and report for the Fortner project and noted that the State’s data shows a decrease in water. She referred to the zoning issue and the number of five-acre parcels in the western portion of the County and noted that it was the Board’s order that no zoning be changed. She commented on the current General Plan’s allowance of two and one-half acres with clustering and noted that Catheys Valley does not have the water and septic capacity for this in most cases. She referred to the issue relative to the timeframes for processing applications and noted that most of the time, the applicants are not fully prepared when they submit their application and it takes them time to complete the data. She referred to the issue of meeting the housing demands for staff of UC Merced and noted that Merced has available housing; and she noted that a new UC Merced city is being proposed. She advised that the professors that chose to live in Mariposa are returning to Merced, and there are properties for sale in Catheys Valley. She referred to a case study cited by Habitat for Humanity relative to affordable housing in rural areas – it is not reasonable because of the expense and distance. She noted that demand drives building and profit drives subdivision. She feels that self-subdivision without any intent to build out the housing takes away from the grazing and creates fire hazards. She noted that time is money and potentially a penalty if the Housing Element isn’t adopted timely.

The public portion of the hearing was closed and the Board commenced with deliberations. Kris Schenk, Larry Enrico/Senior Planner, and Mark Niskanen responded to questions from the Board as to whether there is a proposal for a longer life for the Housing Element; relative to being able to amend the document before the five year period is up; relative to the testimony and priority to implement the policies of the General Plan; relative to the State’s review of the Element for compliance and whether the State sees all of the comments that were received; clarification that hillside standards are not a component of the Housing Element; relative to inclusion of the “field of dreams” in the map; whether the parcels by the Hospital could be annexed to MPUD; whether the goal for the number of housing units in the last Housing Element was reached; clarification that Habitat for Humanity is one of the public agencies that was included; clarification that the Housing Element covers the entire County; clarification that agencies have been provided an opportunity to submit comments and that the hearing was duly noticed; and relative to what happens if the goal of the Element has not been met. Steve Dahlem, County Counsel, advised that he is unable to render
an opinion in regard to the legal issues submitted last week and this week; and he advised of options for the Board. Staff responded to questions relative to clarification of the time period for this Element; and relative to review of the additional comments that were submitted on Monday and during this hearing and being able to further respond during the review process. Rick Benson, County Administrative Officer, responded to questions from the Board relative the Community Block Grant funding being tied to having a current Housing Element and the impact on programs. (M)Cann, (S)Allen, Res. 09-595 was adopted adopting a Negative Declaration and approving the Housing Element update based upon the recommended findings. Further discussion was held relative to approving the Element. The motion was amended, agreeable with the maker and second, to include direction for staff to make technical corrections/Ayes: Turpin, Bibby, Cann, Allen; Excused: Aborn. The hearing was closed.

Supervisor Turpin advised that he received a call from PG&E advising of efforts to restore power to the Greeley Hill area.

CLOSED SESSION: Conference with County Labor Negotiator; Name of Employee Organization: SMA (Sheriffs’ Management Association); Name of County Designated Representative: Richard Bolanos (County Administrative Officer/Personnel/Risk Manager)

BOARD ACTION: Rick Benson advised that this closed session is not needed.

**Board Information**

Supervisor Cann advised that last week was busy. He attended the Mariposa-Yosemite Forum meeting on Wednesday; and the Economic Development Corporation meeting, and he commented on their grant research program. He met with three different developers that have projects in the works: Yosemite West, Manzanita Estates, and Story Hill. He advised that he was scheduled to be a backup judge for the Merry Mountain Christmas parade for December 12th, however, he is unable to attend on December 19th. He plans to attend the RCRC (Regional Council of Rural Counties) meeting in Sacramento on Wednesday. He thanked Marvin Wells and Witt Hawkins for their presentation. Dana Hertfelder, Public Works Director;

Authorize the Department of Public Works to Issue a Request For Proposal (RFP) for a Fixed Base Operator for Mariposa-Yosemite Airport (Continued from December 1, 2009)

**BOARD ACTION:** Discussion was held with Dana Hertfelder. Rick Benson advised of the updated RFP that was distributed.

Input from the public was provided by the following:

Marvin Wells clarified the 9-5, seven days a week schedule for operation. He advised that he agrees with the selection of the ad hoc committee to work on the Airport issues.
Dick Hutchinson asked how the RFP falls within the guidelines of the ad hoc committee and the Advisory Committee. Dana Hertfelder responded that this is one of three business plan proposals that have been reviewed.

Rita Kidd stated this sounds like a good move. She commented on privatization and contracting for the service and the government not abrogating responsibility or oversight of those services; and she recommended that there be no obligation to award from this RFP, and that selection of the vendor be to the most qualified and not the least cost.

Peter Schimmelfennig stated he is a member of the ad hoc committee, and he provided input on the three business plans that the committee is working on.

Discussion was held. (M)Turpin, (S)Cann, Res. 09-608 was adopted approving the issuance of the RFP. The motion was amended by the second, agreeable with the maker, to include the recommendations that there be no obligation to award the RFP and to go with the best value/Ayes: Aborn, Turpin, Cann, Allen; Excused: Bibby.

10:38 a.m. Recess

10:52 a.m. Jeffrey Hentz, Executive Director, Yosemite/Mariposa Tourism Bureau;
PowerPoint Presentation on Past, Current, and Future Marketing Updates

**BOARD ACTION:** Jeff Hentz gave the presentation and discussion was held. Supervisor Turpin initiated discussion relative to the 45-foot bus length restriction for North County. Jeff Hentz responded relative to efforts to promote Highway 132. Supervisors acknowledged and commended Jeff Hentz and staff for their work. Jeff Hentz thanked his Board of Directors.

Input from the public was provided by the following:

Ruth Shane congratulated Jeff on his efforts; and she provided some cautionary comments as to whether there is coordination with the Park Service staff on tourism efforts and their limited carrying capacity.

Mike McCreary stated he is impressed with the efforts and impacts on the economy. He expressed concern relative to possible unintended consequences of maintaining the quality of the environment as the environment is our economy. He referred to earlier comments about implementation of the General Plan and the need to maintain the world-class corridor to the world-class destination.

Peter Schimmelfennig commented on the investment of the transient occupancy tax dollars and advised that speaking as the owner of the Hotel Jeffery, they are still not seeing the results in the North County.
Eleanor Keuning referred to the recent videos sponsored by the Tourism Bureau that were shown in the Bay area and advised that Coulterville was included. She agrees that we need a facility that can be utilized for meetings, i.e., retreat/convention facilities. She referred to a Fresno Bee story relative to considering a study of whether a method of transportation should be developed to get people from the Airport to the Parks. She noted that there are many activities in the County for people that are coming to the Park.

Kris Schenk, Planning Director;
Adopt a Resolution for Action on Appeal No. 2009-114, an Appeal of the Planning Director’s Determination Regarding a Portion of Certificate of Compliance Application No. 2007-093 for Twelve (12) “Fractionalized” Patents. Applicants and Appellants: Jeff Miller and Layne Clifton (Project Site for Certificate of Compliance Application No. 2007-093 was APN 016-080-002 (Now a Retired APN); 871 Highway 140 Near the Merced/Mariposa County Line)

BOARD ACTION: Kris Schenk advised that additional questions were received relative to the findings so this matter was continued to today. Supervisor Cann referred to the Board’s decision based on the term of “extrinsic” evidence; and he noted that the testimony that was received was not sworn and was not collaborated relative to the fractionalized parcels. Given the timeframes and the age of the applicant at the time of the meeting that that applicant testified about, and the Tehama case requirements for overwhelming documentation which was not provided; he advised that he is reconsidering his position on this matter. He asked County Counsel to provide input on the options available to the Board at this time. Steve Dahlem, County Counsel, advised that the Board did not take final action on this and that is the purpose of the resolution on today’s agenda. He advised that the Board can adopt the resolution granting the appeal, or adopt it with modification; reopen deliberations; or reopen the hearing for more public testimony. He further advised that if the Board considers reopening the deliberation or the hearing, that the applicant is ill and unable to attend today and would like a continuance to be able to participate. Supervisor Cann asked that the hearing be reopened and discussion was held. County Counsel advised that it would be appropriate to open this matter for public comment at this time and to limit it to the resolution and whether to adopt it or to reopen the hearing.

Input from the public was provided by the following:
Rita Kidd stated she can appreciate the opportunity to be able to make comments and to allow the applicant to appear. However, she is concerned that two pieces of information that were submitted (after the hearing) have not been entered into the public record either orally or before this Board, and she asked whether that would be an option. County Counsel responded in the affirmative. Supervisor Cann advised that reading written testimony into the record does not give it any more weight. Rita Kidd noted that members of the public are present that are not privy to the rationale in this matter. She is willing to abide by County Counsel’s recommendation, but feels there is a question relative to the meeting requirements. She said that it is a very forthright move on the part of the Board to question the November 3rd discussion and to perhaps reopen the hearing and she urged that the Board do so given the legal advice on this case and she feels that the Farm Bureau should be encouraged to be present. She commented on the process and stated she feels that we are privileged in this County of having an excellent Planning staff, and she feels they were excellent in their staff report; and she noted the amount of work that is involved in an application in comparison with the fees that are paid. She feels the letter from the Farm Bureau was excellent and MERG was surprised by the Board’s action and that is why their letter was submitted on November 30th.

(M)Cann, (S)Turpin, Res. 09-609 was adopted re opening the public portion of the hearing on Appeal No. 2009-114; Miller/Clifton, applicants and appellants, and continuing it to January 19, 2010, at 2:00 p.m./Ayes: Aborn, Turpin, Cann, Allen; Excused: Bibby.

Dana Hertfelder, Public Works Director;

Authorize the Department of Public Works to Issue a Request For Proposal (RFP) for a Fixed Base Operator for Mariposa-Yosemite Airport (Continued from December 1, 2009)

**BOARD ACTION:** Discussion was held with Dana Hertfelder. Rick Benson advised of the updated RFP that was distributed.

Input from the public was provided by the following:

Marvin Wells clarified the 9-5, seven days a week schedule for operation. He advised that he agrees with the selection of the ad hoc committee to work on the Airport issues.
Dick Hutchinson asked how the RFP falls within the guidelines of the ad hoc committee and the Advisory Committee. Dana Hertfelder responded that this is one of three business plan proposals that have been reviewed.

Rita Kidd stated this sounds like a good move. She commented on privatization and contracting for the service and the government not abrogating responsibility or oversight of those services; and she recommended that there be no obligation to award from this RFP, and that selection of the vendor be to the most qualified and not the least cost.

Peter Schimmelfennig stated he is a member of the ad hoc committee, and he provided input on the three business plans that the committee is working on.

Discussion was held. (M) Turpin, (S) Cann, Res. 09-608 was adopted approving the issuance of the RFP. The motion was amended by the second, agreeable with the maker, to include the recommendations that there be no obligation to award the RFP and to go with the best value/Ayes: Aborn, Turpin, Cann, Allen; Excused: Bibby.

Dennis Wister, Interim Building Director;
Waive Second Reading and Adopt an Ordinance Revising Chapter 15.10 of the Mariposa County Code Modifying the Appendixes Adopted within the 2007 California Building Code to Correct Inconsistencies between County Code and Building Code (Continued from December 1, 2009)

**BOARD ACTION:** Discussion was held with Dennis Wister relative to a permit not being required for exchanging propane tanks; and relative to providing notice to the contractors of changes in rulings. (M) Allen, (S) Turpin, the second reading was waived and Ordinance No. 1066 was adopted revising Chapter 15.10 as recommended. The Clerk of the Board read the title of the Ordinance into the record. Ayes: Aborn, Turpin, Cann, Allen; Excused: Bibby.

**BOARD ACTION:** Dr. Mosher provided a status report.

Input from the public was provided by the following:
Jeanetta Phillips asked when the vaccine will be available for the elderly. Dr. Mosher advised that a clinic was held and they are getting more vaccine and will hold clinics for everyone starting in January.

**10:38 a.m.** Recess

**10:52 a.m.** Jeffrey Hentz, Executive Director, Yosemite/Mariposa Tourism Bureau;
PowerPoint Presentation on Past, Current, and Future Marketing Updates

**BOARD ACTION:** Jeff Hentz gave the presentation and discussion was held. Supervisor Turpin initiated discussion relative to the 45-foot bus length restriction for North County. Jeff Hentz responded relative to efforts to promote Highway 132. Supervisors acknowledged and commended Jeff Hentz and staff for their work. Jeff Hentz thanked his Board of Directors.

Input from the public was provided by the following:
Ruth Shane congratulated Jeff on his efforts; and she provided some cautionary comments as to whether there is coordination with the Park Service staff on tourism efforts and their limited carrying capacity.

Mike McCreary stated he is impressed with the efforts and impacts on the economy. He expressed concern relative to possible unintended consequences of maintaining the quality of the environment as the environment is our economy. He referred to earlier comments about implementation of the General Plan and the need to maintain the world-class corridor to the world-class destination.

Peter Schimmelfennig commented on the investment of the transient occupancy tax dollars and advised that speaking as the owner of the Hotel Jeffery, they are still not seeing the results in the North County.
Eleanor Keuning referred to the recent videos sponsored by the Tourism Bureau that were shown in the Bay area and advised that Coulterville was included. She agrees that we need a facility that can be utilized for meetings, i.e., retreat/convention facilities. She referred to a Fresno Bee story relative to considering a study of whether a method of transportation should be developed to get people from the Airport to the Parks. She noted that there are many activities in the County for people that are coming to the Park.

Kris Schenk, Planning Director;
Adopt a Resolution for Action on Appeal No. 2009-114, an Appeal of the Planning Director’s Determination Regarding a Portion of Certificate of Compliance Application No. 2007-093 for Twelve (12) “Fractionalized” Patents. Applicants and Appellants: Jeff Miller and Layne Clifton (Project Site for Certificate of Compliance Application No. 2007-093 was APN 016-080-002 (Now a Retired APN); 871 Highway 140 Near the Merced/Mariposa County Line)

**BOARD ACTION:** Kris Schenk advised that additional questions were received relative to the findings so this matter was continued to today. Supervisor Cann referred to the Board’s decision based on the term of “extrinsic” evidence; and he noted that the testimony that was received was not sworn and was not collaborated relative to the fractionalized parcels. Given the timeframes and the age of the applicant at the time of the meeting that the applicant testified about, and the **Tehama** case requirements for overwhelming documentation which was not provided; he advised that he is reconsidering his position on this matter. He asked County Counsel to provide input on the options available to the Board at this time. Steve Dahlem, County Counsel, advised that the Board did not take final action on this and that is the purpose of the resolution on today’s agenda. He advised that the Board can adopt the resolution granting the appeal, or adopt it with modification; reopen deliberations; or reopen the hearing for more public testimony. He further advised that if the Board considers reopening the deliberation or the hearing, that the applicant is ill and unable to attend today and would like a continuance to be able to participate. Supervisor Cann asked that the hearing be reopened and discussion was held. County Counsel advised that it would be appropriate to open this matter for public comment at this time and to limit it to the resolution and whether to adopt it or to reopen the hearing.

Input from the public was provided by the following:

Rita Kidd stated she can appreciate the opportunity to be able to make comments and to allow the applicant to appear. However, she is concerned that two pieces of information that were submitted (after the hearing) have not been entered into the public record either orally or before this Board, and she asked whether that would be an option. County Counsel responded in the affirmative. Supervisor Cann advised that reading written testimony into the record does not give it any more weight. Rita Kidd noted that members of the public are present that are not privy to the rationale in this matter. She is willing to abide by County Counsel’s recommendation, but feels there is a question relative to the meeting requirements. She said that it is a very forthright move on the part of the Board to question the November 3rd discussion and to perhaps reopen the hearing and she urged that the Board do so given the legal advice on this case and she feels that the Farm Bureau should be encouraged to be present. She commented on the process and stated she feels that we are privileged in this County of having an excellent Planning staff, and she feels they were excellent in their staff report; and she noted the amount of work that is involved in an application in comparison with the fees that are paid. She feels the letter from the Farm Bureau was excellent and MERG was surprised by the Board’s action and that is why their letter was submitted on November 30th.

(M)Cann, (S)Turpin, Res. 09-609 was adopted reopening the public portion of the hearing on Appeal No. 2009-114; Miller/Clifton, applicants and appellants, and continuing it to January 19, 2010, at 2:00 p.m./Ayes: Aborn, Turpin, Cann, Allen; Excused: Bibby.
